Memorandum 91-35

Subject: Commission's Handbook of Practices and Procedures

The Commission's Handbook of Practices and Procedures collects procedural decisions and Commission practices. From time to time the Handbook is updated and reissued. The attached edition of the Handbook is current, having last been revised at the May-June 1990 meeting. The staff is unaware of any decisions made since then that would need to be incorporated. Material in the appendices has been updated to the extent possible.

This memorandum does not require any action. It is merely intended to forward the latest edition of the Handbook to Commissioners. However, if the Commission wishes to make any corrections or revisions, this would be an appropriate time to do so.

Respectfully submitted,

Stan Ulrich
Staff Counsel
