

Memorandum 2017-9

**Relationship Between Mediation Confidentiality and Attorney Malpractice
and Other Misconduct (Public Comment)**

Since the Commission's most recent meeting, it has received a new communication from mediator Lee Jay Berman, which the staff plans to present in a supplement to Memorandum 2016-59 (Possible Additional Reforms to Include in the Tentative Recommendation).¹ The Commission has also received a new letter from Loretta Van Der Pol and J. Felix De La Torre on behalf of the Public Employment Relations Board, which the staff plans to present in Memorandum 2017-8 (Further Work on Draft Tentative Recommendation).

The staff also received an email message in December reporting that 100 more people had recently signed the online petition by Citizens Against Legalized Malpractice.² Currently, the total number of signatories is about 820.

Some of those signatories submitted supplemental comments that we have not previously reproduced for the Commission, either because they did not yet exist or because they were not accessible to the staff until Change.org recently revised its website. Those supplemental comments are attached for the Commission to consider. See Exhibit pp. 1-32.³

As before, the supplemental comments come from California, many other states, and a few foreign countries. Many of the commenters describe a frustrating court experience⁴ or express deep concern about the judicial system in

1. Any California Law Revision Commission document referred to in this memorandum can be obtained from the Commission. Recent materials can be downloaded from the Commission's website (www.clrc.ca.gov). Other materials can be obtained by contacting the Commission's staff, through the website or otherwise.

The Commission welcomes written comments at any time during its study process. Any comments received will be a part of the public record and may be considered at a public meeting. However, comments that are received less than five business days prior to a Commission meeting may be presented without staff analysis.

2. The online petition is available at https://www.change.org/p/the-california-law-revision-commission-change-the-statutes-that-legalize-malpractice?response=b21b75d0be86&utm_source=target&utm_medium=email&utm_campaign=one_thousand. The text of the petition is also reproduced in Memorandum 2015-46, Exhibit pp. 210-11.

3. The staff has redacted a few names and other identifying information, because that information is unnecessary for the Commission's purposes and it is possible that someone might consider the unredacted statements defamatory or otherwise problematic.

4. See, e.g., Exhibit pp. 5 (comments of Cassandra Todd), 6 (comments of Tara Cole), 12 (comments of Maria G).

their area.⁵ Others voice great distrust of attorneys⁶ or stress that it is important to hold attorneys accountable for their actions.⁷

Only a few of the supplemental comments mention mediation or focus in any detail on the topic of this study: the relationship under current law between mediation confidentiality and attorney malpractice and other misconduct. Examples include the following:

- Sara Hoffman says: “For many, going into mediation with a bully is futile.”⁸
- Jenny James says: “There is much corruption and lying in settlement/mediation conferences.”⁹
- Angela Spanos says: “The Cassel decision completely bars Californians from successfully suing their attorney for malpractice committed during the course of a mediation regardless whether the attorney lied to his client, convinced the client to settle by misrepresenting the truth or even defrauded his client.”¹⁰ She elaborates at length on why the *Cassel* approach should “be made into BAD LAW.”¹¹
- Deanne Upson says: “the Cassel case leads to an absurd result — one that allows lawyers to be sloppy, negligent and incompetent without cost to them, and even worse, to cheat their clients with impunity.‘!?!?!?’”¹²

As yet, the Commission has not received any other new input relating to this study. If additional comments arrive before the upcoming meeting, the staff will present them in a supplement to this memorandum.

Respectfully submitted,

Barbara Gaal
Chief Deputy Counsel

Taken from the FindLaw.com website: The Sixth Amendment guarantees the right to legal counsel at all significant stages of a criminal proceeding. This right is so important that there is an associated right given to people who are unable to pay for legal assistance to have counsel appointed and paid for by the government. This is an outrage and in my opinion unconstitutional.

I have kids that were taking away from there mother while I was incarcerated. When I got out I filed for custody and went to the parenting classes and other classes that I paid for that they suggested that I do. I the middle of my case [the judge] was pulled off bench and locked up. Not one person contacted me and informed of this. They also never notified me that a new judge and court date was appointed including my public defender. One day I received a phone call from the caseworker asking me why I was not in court that they granted custody to the state. When I asked why they never informed me and why didn't they grant a continuance the caseworker told me that I got out of jail to late. The mother was granted many continuances and never showed up for court. I missed one court date due there fault and never given a chance.

Professionals should be held accountable for their mistakes. While it is perfectly alright to err, to commit gross negligence is something that is not only deplorable but, more importantly, unethical. If the law says that lawyers can do whatever they please, then this should be shared by everyone as well. While I am from the Philippines and our Judiciary is perhaps one of the worst, I do believe that the US should be the role model for other countries to follow. If this Act alone already legalizes unethical and highly negligent acts, what is preventing other professions from not renegeing on their professional vows?

[Bank X] fraudulently stole my home from me in CA. I didn't have money for a lawyer, so when i sued them in State and Federal Court, I had to act as my own attorney, being Pro Per. After a four year battle, I proved to the court the fraud, however the court dismissed the case and silenced my court documents. I am completing my book on the subject as we speak. I am also producing a documentary that will follow the release of my book.

My question is this; If a Trustee is to be an independent third party to a Deed of Trust agreement in order to protect both parties from any harm from either party, yet they are allowed by the courts to file fraudulent paperwork on behalf of the banks during the foreclosure process, how then is it NOT fraud if the banks know this yet still offer borrowers a Deed of Trust document knowing that the Trustee is NOT independent and file fraudulent paperwork on behalf of the banks, when it is the job of the Trustee to make sure that BOTH parties are acting in accordance to the rules of law regarding the contract agreement? This complicit nature of the courts allowing the banks to file fraudulent paperwork also allow banks to foreclose on someone who doesn't even have a loan with any lender. As soon as I showed this information to the court, the judge dismissed my case. Despite other corruption I experienced in the courts, this was the biggest. This action allows the banks to illegally foreclose on anyone, anytime, anywhere in a Deed of Trust state. There are currently 34 Deed of Trust states, and all other states are currently going through the process of going from standard mortgage agreements to Deeds of Trust. This will make it available for any bank to foreclose on any property owner at any time, anywhere.

My follow up question is then: If over 85% of all home real estate transactions have been securitized nationwide and packaged into mortgage backed securities, in order to do this the initial lender must SELL the note, so that the new Trust can go through the securitization process in accordance with the rules of the SEC, how then can the initial lender come back to the table later on down the road and foreclose on the borrower claiming they have standing to foreclose? They cannot have standing to foreclose if they sold the note to another party. Also, this means that the Trustee filed fraudulent paperwork in order to allow the courts to even THINK that the bank might have the right to foreclose.

I would enjoy the opportunity to discuss this in extreme detail with you if you need help answering my question. THIS is the basis of the foreclosure nightmare that is continuing across this nation decimating families and the economy and NO ONE is talking about this. You can find more information on this exact subject at my website: mycourthistory.com

[XXX], with whom she has not lived since she was 1 year old, keeps her hostage at an undisclosed location, demanding money. He has terminated all contact since May 9th, 2015, thereby breaking all court orders.

Not only [has ZZZ] been bankrupted trying to fight this in [YYY] County Superior Court, Judge [BBB] has threatened [ZZZ] that if [ZZZ] were to pursue a custody trial she would make sure [ZZZ] would lose it, [ZZZ] would never see [Child A] again and she would seize [ZZZ's] mother's assets in The Netherlands (there are none!). Judge [BBB] ruled that she allows [XXX] to get away with breaking her own court orders and is not willing to investigate the matter through a 3118 child sexual abuse investigation and drug testing of [XXX]. She is not facilitating contact between [Child A] and [ZZZ] and she is not allowing [ZZZ] to know where [Child A] lives either.

I'm signing because its an act that has had horrendous outcomes brought upon by a person that a client is supposed to be able to trust by the wording in many laws stating the neutrality, unbiased, obligations attorneys are required to pursue once they have accepted a clients payment therefor they have accepted into a client/attorney contract that should not need written requirement for they act as a person in knowledge of law, but then therefor they must knowingly commit premeditated theft and knowing that you have committed a felony by stealing thousands of dollars is by no means a simple malpractice, it is a criminal act that should be deemed illegal and it should disbar any attorney caught doing the felony theft. I sign because I'm in a custody battle in Indiana and have been lied to by my attorney, have had him make "behind the curtain" deals with opposing council, and have had an attorney say they would help and instead keep my payment by saying it was legal fees for telling me things that I already knew in which I was the one asking him why wouldn't several different ways to proceed in my case work since by law there was requirements that the other has failed to meet as he would simply reply that he "just don't like that idea". Well we don't write ideas in law books, if citizens face punishment, then so should citizens that happen to know law or are recieve a paycheck as

government employees. I have suffered, my kids have suffered, and almost 75% of the population has suffered due to the rampant misuse of power and illegal activities that get carried out daily in what was once a system of “justice”. Anyone who agrees with this “do as I say, not as I do” lawmaking is a disgust to this great nation and should be treated as some of the lowest forms of trash for they have used deception and lies to destroy what was supposed to let us know right from wrong in conflicting situations. I strongly suggest disbarment of all attorneys that practiced this illegal malpractice in all senses either it be past, present, or future. I’m a 28 year old single father that has been ruined over this corruption, so I still have a long life to preach about the illegal activity labeled as supposed justice and I refuse to be silenced spreading my knowledge about it, so I’d rather see it changed immediately and California has a chance to be the first to step up and say this needs to be stopped now. The rest of the country will follow as ones who represent greed are phased out by ones who represent truth. Remember honesty is the best policy, so why do we teach our kids that when those in power lie to earn a living? How can we trust attorneys to protect our interests when they can commit crimes if it better serves their interests instead? How can trial be fair if only one side has honest representation? How can they call themselves mediators when they are actually playing the role of an agitator? Lastly, being able to live as such speaks pages about their characters and some of the worst felons have not even stopped to the lows they have to earn a dollar. They should be disgusted and ashamed of themselves because the rest of the people sure are already feeling that towards them. Shame on the offenders and supporters of illegal malpractice.

I face lawyers barristers and majestrates that have fabricated court documents I have evidence of them perverting the course of natural justice and supplied it to the legal service commissioner whom inturn replied with an illegal response not registered in their system,if you alter a court seal with a biro to change the dates it is seen as a very serious crime but if a lawyer barrister and majestrate get together and do it it is ok,why?they are allowed to pervert the course of natural justice this is so wrong and I shutter to think how many times they have done this before to other people whom would be blind to their high profile corruption.everybody should be under one law..what kind of place can go forward with lawyers barristers and judges allowed to breach the written law acts and general citizen must comply or be jailed..is this ok?

It is my belief (education&personal experience) that due to this allowance of criminal negligence (it's fraud & theft) that I have lost custody of my child whom I love more than any words could give merit to. I'm missing out on making meals for my child, helping him with school work, watching tv and playing games, having the opportunity to discipline him (my way which I know it's safe) making sure he's saying his prayers and learning how to behave correctly in specific situations.. Most of all just having him around to hug on whenever I want, to talk to him without judgement or having some

other adult hang over my shoulder making me feel dirty, “unfit” and like a criminal. I am outraged by my current reality and if I could find an atty who would take my case on a good faith basis I would be back in court not only to recover my rights as his mother, but to protest those responsible and suing for damages in civil court. Time is of the essence as he’s 10 years old and growing. I’ve already missed his last two birthday’s, a Mother’s Day, the last two 4th of July’s, Thanksgivng Christmas 2013, and this horrible Christmas around the corner. His father wants me completely out of the picture because he decided he wanted a new wife therefore; he did just as he said from the beginning he was going to do, made her my child’s new mother and doesn’t have to pay me a “damn dime.” He was successful in his ruining my life with his smear campaign, controlling and abusive tactics, all with the help of family court which should have been on my side protecting me and my child in the first place. If they had done their job (if correct policies and processes where in place) they would have known what kind of situation they were dealing with which would have shielded me from two more long painful years of torment even after he had already left. I also would not be homeless right now. Which the court is aware of and went ahead and erased the \$9,000 he owed and cancelled my support orders all together. The court doesn’t care how hard I worked for YEARS to lose it all because my husband lied, stole and cheated after he changed his mind about the vow’s he promised to me. The court doesn’t care that they placed my son with two abusive personalities that both have a documented record of. I miss my son, I think its more than unjust verdict. I think it the worst form of cruelty and an example of inhumanity.

I sued my attorney for malpractice after he put me under duress, forcing me to accept a settlement of only \$12,000 on a loss of over \$950,000. Such a clause takes from the client their right to accept or reject an offer. The court let him win and I have been living in my car. This law must be made into BAD LAW. The Cassel decision completely bars Californians from successfully suing their attorney for malpractice committed during the course of a mediation regardless whether the attorney lied to his client, convinced the client to settle by misrepresenting the truth and or even defrauded his client. This court decision effectively gives attorneys Cart Blanche to coerce, to lie, deceive, with hold information, provide terrible advice, having lack of knowledge of the case and including cases he is not representing that affects the clients awards..basically in way that falls below the professional standards of practice in California simply because the behavior occurred during a mediation. GO to Fb "Mediation Confidentiality" to read full documents. The limited signing of this Change.org petition is a result that it is not known by the Californian constituents. The Lawyers , Mediators and State Bar have supported this thru the their representatives and lobbyists to ensure this law remains quiet and away frm the public. Few Attorneys know of this as do same with Judges.

Many consituents have fallen victim to this get oput of jasil card free by their attorney and have no way of having their voices heard, NOT ONLY SIGN THIS but send in letters to the CLRC to hear your mishandling as most that are being submitted are from Lawyers and Mediators favoring it to remain law. And if reversed it should be retroactive to Jan 11, 2011 for all cases settled with proven malpractice.

The HONorable Judge Chin who submitted his findings for the Supreme Courts decision : "Perhaps this is what bothered Judge Chin, who said in his concurring opinion, that he "reluctantly concurred in the majority's decision," Justice Chin concluded by saying that he "greatly doubts that the Legislatures purpose in mandating confidentiality was to permit attorneys to commit malpractice without accountability."

The Honorable Judge Chin states in his concurrence, also included in the Cassel v. Supreme Court of California that., "I am not completely satisfied that the legislature has fully considered whether Attorneys should be shielded from accountability in the way. There may be better ways to balance the competing interest than simply providing that an attorney's statements during mediation may never be disclosed. Such a provision will make it so attorneys will never be accountable for their actions. But this court can not so hold in guise of interpreting statues that contain no such provision. So the majority notes the legislature remains free to reconsider this question it may wish to do so." Judge Chin went on to say, "Cassel will effectively shield an attorney's action during a mediation, including advising the client, from a malpractice action even if this action is in competent or even deceptive.

Also, to lie to a client that they need them to attend a "Gentleman's meeting to pick the brains of the defense to see if we will go forward with the court calendared mediation or trial"..and instead allows the client to walk into a fasacde of a meeting when it was in fact a mediation. No pre Mediation doucmnets were submitted or the client would have known it was an exited. After 8 hours the truth surfaced he was trying to sold th PI case and her WC case where most of her recoovery was..and no prior awareness or notice was given to the WC attorney to attend. And when the client begged to cottact the WC attoet they refsued saying this had noting to do with the WC case and the attorney did not need

to be there. Yet the attorney settled both cases without knowledge of what the WC case held and that her WC case was not finalized....medical issues were still pending.

This law is supported by all legal entities who favor not being held accountable...and there has been no public notice of this review by the CLRC thru the media as this Law affected us all and is unlawful, those who know are in receipt of the publications of the CLRC monthly newsletters. It has been shielded from the public who will be directly affected to the point of lives lost.
