

ANNUAL REPORT AND RECOMMENDATIONS

Committee on Revision of the Penal Code

2024

- 03 Executive Summary
- 04 Prefatory Notes and Data
- 55 Administrative Report
- 62 Appendix

RECOMMENDATIONS

- 11 Harmonize and Clarify the Post-Conviction Processes for Showing Innocence and Wrongful Convictions
- 17 Expand Post-Conviction Discovery
- 20 Modernize Compensation for Innocent People
- 25 Improve California’s Approach to Driving Under the Influence Offenses
 - A. Create Judicial Diversion for First-Time DUI Offenses
 - B. Expand the Use of DUI Collaborative Courts
 - C. Streamline License Suspensions Related to DUI
- 34 Simplify Civil Asset Forfeiture
- 37 Establish Prosecutor-Led Diversion for Gun Possession Offenses
- 40 Eliminate Accomplice Liability for Implied Malice Murder
- 45 Limit Firearm Enhancements to People Who Used or Were Armed With a Gun
- 48 Prohibit the Felony-Murder Rule in Provocative-Act Murders
- 51 Specify that Proposition 57 Credits Apply to Indeterminate Sentences

Table of Contents

Executive Summary

The Committee on Revision of the Penal Code was established by the Legislature and the Governor to study all aspects of criminal law and procedure and make recommendations that would simplify and rationalize the law. The Committee's recommendations have the goals of improving public safety, reducing unnecessary incarceration, improving equity, and addressing racial disparities in the criminal legal system.

This is the Committee's fifth Annual Report. Numerous recommendations by the Committee have become law in 21 bills passed by the Legislature and signed by the Governor, including 5 bills this year.

The 10 new recommendations in this Report are unanimously recommended by the Committee and include improving California's approach to drunk driving offenses, improving due process for asset forfeitures while preserving law enforcement's flexibility to use this powerful tool, removing ambiguity and confusion from the processes convicted people can use to prove they are innocent, and clarifying the limits of accomplice liability in murder cases.

The Committee's recommendations are based on testimony from more than 40 witnesses, public comment, thorough staff research, and deliberations of Committee members over the course of 5 public meetings. The recommendations are supported by legal analysis, empirical research, experience from other jurisdictions, and data provided to the Committee by the California Department of Corrections and Rehabilitation and the California Department of Justice and analyzed by the California Policy Lab.

As described in detail below, the recommendations are:

1. Harmonize and Clarify the Post-Conviction Processes for Showing Innocence and Wrongful Convictions
2. Expand Post-Conviction Discovery
3. Modernize Compensation for Innocent People
4. Improve California's Approach to Driving Under the Influence Offenses
 - a. Create Judicial Diversion for First-Time DUI Offenses
 - b. Expand the Use of DUI Collaborative Courts
 - c. Streamline License Suspensions Related to DUI
5. Simplify Civil Asset Forfeiture
6. Establish Prosecutor-Led Diversion for Gun Possession Offenses
7. Eliminate Accomplice Liability for Implied Malice Murder
8. Limit Firearm Enhancements to People Who Used or Were Armed With a Gun
9. Prohibit the Felony-Murder Rule in Provocative-Act Murders
10. Specify that Proposition 57 Credits Apply to Indeterminate Sentences

Prefatory Notes & Data

CRIME AND CLEARANCE RATES

As it has in previous Reports, the Committee presents the most current information about crime rates in California. Note that statewide crime data is not made publicly available by the California Department of Justice until the summer following the relevant year.

Data for 2023 in California, which includes corrected numbers for the Oakland Police Department,¹ shows the following:

- The overall violent crime rate was essentially flat compared to 2022 and decreased less than 1%. Violent crime consists of homicide, aggravated assault, robbery, and rape.
- The overall property crime rate decreased by 1.8% compared to 2022. Property crime consists of burglary, car theft, and all other thefts.
- The statewide homicide rate decreased by 16%.²

Despite recent increases in some categories of offenses, crime rates across California continue to be at record lows:

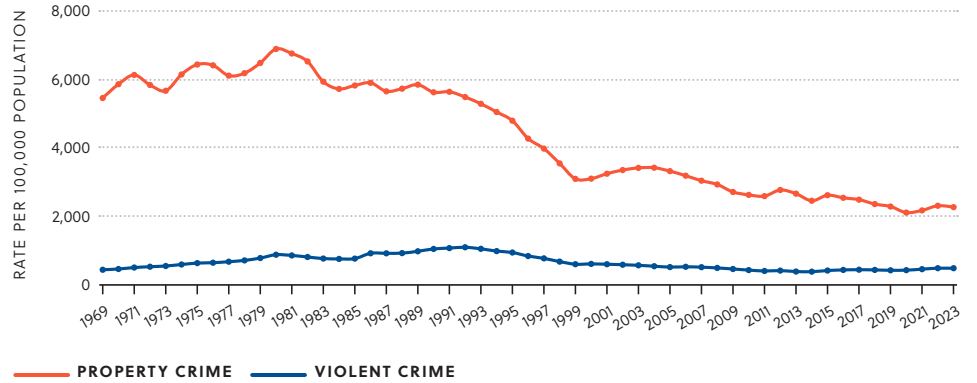

- Compared to pre-pandemic levels, the violent crime rate is 13% higher in 2023 than it was in 2019, but around the same level it was in 2008 and 56% lower than the peak violent crime rate from 1992.
- The 2023 property crime rate is essentially the same as it was in 2019 before the pandemic, with a 0.77% decrease in 2023 compared to 2019. Except for the first 2 years of the pandemic, the 2023 property crime rate is the lowest recorded since at least 1969. The 2023 property crime rate is 67% lower than the peak property crime rate from 1980.
- After an increase during the COVID-19 pandemic – a trend seen throughout the United States³ – California’s homicide rate in 2023 was close to its pre-pandemic level (4.8 in 2023 vs. 4.2 in 2019). The 2019 homicide rate was the lowest recorded in California history since at least 1966. The 2023 homicide rate declined 16% compared to its 2022 rate – the third highest year-over-year decline in the data – and was 67% lower than the peak homicide rate recorded in 1980.

¹ The Oakland Police Department reported incorrect 2023 violent crime data to the California Department of Justice. The incorrect data showed a 138% year-over-year increase in violent crime, driven mainly by aggravated assaults. Though the Oakland Police Department has acknowledged this error, the data maintained by the California Department of Justice has not been updated. The data presented here uses what the Oakland Police Department reported publicly (7,526 violent crimes in 2023, including 3,531 aggravated assaults), instead of the incorrect information reported to the California Department of Justice (15,491 violent crimes, including 11,169 aggravated assaults). See Danielle Echeverria, *California report says violent crime us up statewide. Our analysis suggests that's wrong*, San Francisco Chronicle, July 24, 2024. In addition, the 2023 crime data from the California Department of Justice is incomplete because a larger-than-usual number of agencies did not report full data in 2023, including the San Jose Police Department and the San Bernardino County Sheriff's Department. See *Crime in California 2023*, 5; Crimes and Clearances "READ ME", OpenJustice, 14–16 (June 2024). Because some of the differences in crime rates for 2023 compared to 2022 were relatively small, they could change if full data was reported.

CALIFORNIA HOMICIDE RATE (1969–2023)

Source: California Department of Justice, 2023 *Crime in California*, Table 1.

Available data for 2024 shows promising signs of continued crime decreases. According to data from the FBI through the middle of 2024 covering 47 large cities in California, violent crime declined 3% and property declined 10% compared to the same time period in 2023.⁴ Data for individual offenses are in the following table.

YEAR-TO-DATE CRIME STATISTICS, JANUARY-JUNE, 2024 VS. 2023								
	Murder	Rape	Robbery	Agg. assault	Burglary	Theft	Car theft	Arson
California	-20.00%	-15.17%	-4.46%	-1.29%	-16.65%	-10.05%	-3.76%	+3.08%

Source: FBI, Crime Data Explorer, Quarterly Uniform Crime Report. The California data includes 47 cities with approximately 9.8 million people, including San Diego, Long Beach, and Fresno, but does not include other large cities such as Los Angeles, Oakland, Sacramento, or San Francisco.

More recent data confirms this trend. According to data through September from the Major Cities Chiefs Association covering eight of the of the largest jurisdictions in California, violent crime has decreased an overall 5.76% – including a 13% decrease in homicides and a 17% decrease in reported rapes – compared to the same period in 2023.⁵ (The Major Cities Chiefs Association does not report on property crime.)

4 FBI, Crime Data Explorer, Quarterly Uniform Crime Report, 2024 Quarter 2, inclusive of January through June 2024.

5 Major Cities Chiefs Association, Violent Crime Survey — National Totals, Midyear Comparison, January 1 to September 30, 2024, and 2023, November 6, 2024.

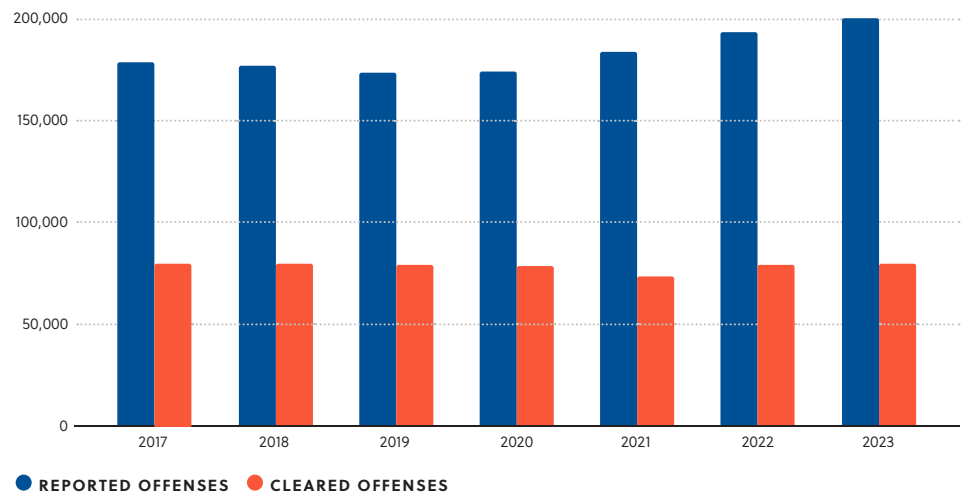

YEAR-TO-DATE VIOLENT CRIME STATISTICS JANUARY-SEPTEMBER, 2024 VS. 2023									
Agency	All violent crime	Homicides	Homicide percent change	Rapes	Rape percent change	Robberies	Robbery percent change	Aggravated assaults	Aggravated assault percent change
Fresno PD	-1.23%	-5	-17.24%	-25	-17.01%	-15	-2.14%	+18	1.36%
Long Beach PD	-2.83%	+14	+82.35%	-1	-0.26%	+139	+20.56%	-232	-13.33%
Los Angeles PD	-6.01%	-23	-9.24%	-177	-11.95%	+160	+2.49%	-1363	-8.98%
Los Angeles Sheriff	+0.86%	-23	-15.75%	-84	-13.73%	260	8.95%	-56	-0.74%
Oakland PD	-18.40%	-26	-27.08%	-18	-11.46%	-693	-23.66%	-380	-13.16%

San Diego PD	-2.93%	-13	-26.00%	-69	-22.40%	-74	-8.36%	+21	+0.62%
San Francisco PD	-16.25%	-16	-40.00%	-102	-42.86%	-499	-23.73%	-73	-3.92%
San Jose PD	+6.04%	-5	-18.52%	-164	-38.23%	+138	+19.03%	+235	+10.70%
Combined	-5.76%	-90	-13.20%	-659	-17.06%	-703	-3.85%	-2071	-5.40%

Source: Major Cities Chiefs Association, Violent Crime Survey — National Totals, Midyear Comparison, January 1 to September 30, 2024, and 2023, November 6, 2024. San Jose data is through August only.

As the Committee regularly notes, while these statistics are important, they do not present a full picture of crime rates. Nationwide, most crime is unreported.⁶ And the violent and property crime rates reported by the California Department of Justice leave a lot out, including simple assault crimes, other sex offenses, most white-collar offenses, drug crimes, and other economic crimes such as wage theft.

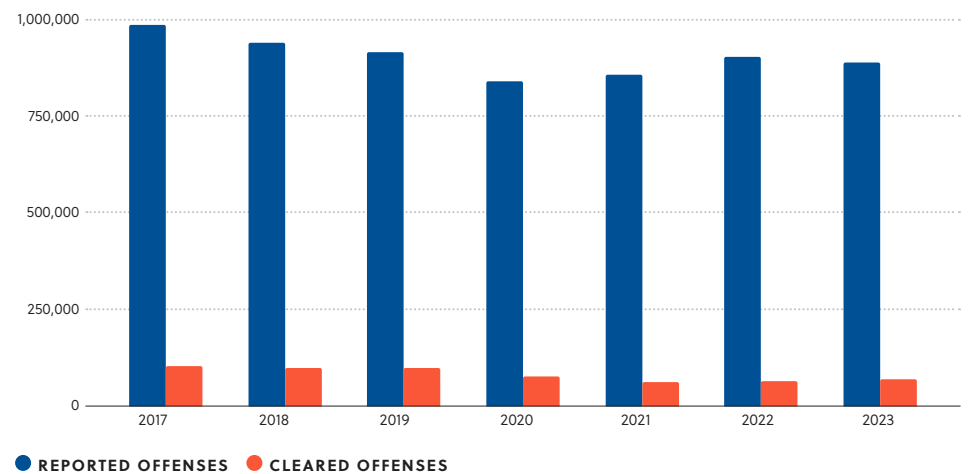

And in California, the clearance rate – the rate at which law enforcement arrests a perpetrator – was 40% for violent offenses and 8% for property crimes.⁷

INCARCERATION TRENDS

California’s prison population is currently around 92,000 people.⁸ California’s prison population dropped significantly during the COVID-19 pandemic and has remained at its lowest sustained level since 1989.⁹

CALIFORNIA PRISON POPULATION (1974–2024)

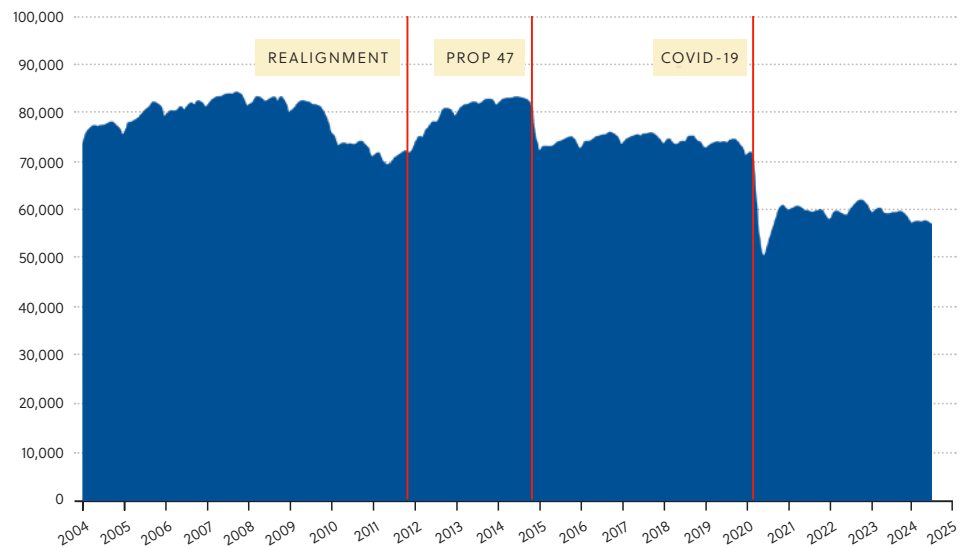

Source: Patrick A. Langan et al., *Historical Statistics on Prisoners in State and Federal Institutions, Yearend 1925–86* (May 1988) (1974–1977); Bureau of Justice Statistics, Corrections Statistical Analysis Tool (CSAT) Prisoners (1978–2018); CDCR Monthly Population Reports (2019–2023); CDCR Weekly Population Report (2024).

The sustainability of this progress is uncertain: in November 2024, voters approved Proposition 36, which, among other provisions, expands the offense of “petty theft with a prior” and allows felony charges for some drug possession offenses. The Legislative Analyst’s Office concluded that the harsher punishments allowed by Proposition 36 could increase the prison population by a few thousand people and increase costs by tens or hundreds of millions of dollars per year.¹⁰

California’s jail population is also lower than it was before the COVID-19 pandemic. Though the population has increased since a dramatic decrease early in the pandemic, it is still 22% lower than it was before the pandemic and is around 57,000 people. According to the Legislative Analyst’s Office, Proposition 36 is also likely to lead to an increase in California’s jail population.¹¹

CALIFORNIA JAIL POPULATION (2004–2024)

Source: California Board of State and Community Corrections Jail Profile Survey. Data is monthly average daily population and ends June 2024. Realignment was a policy change in 2011 that required sentences for certain non-violent and non-serious felony offenses to be served in county jail, not state prison. Proposition 47 was a 2014 voter initiative that reclassified some felony or wobler offenses to misdemeanors.

LEGISLATIVE UPDATE

In 2024, 5 bills passed by the Legislature and signed by the Governor implemented recommendations originated or supported by the Committee in previous reports.

BILL	TOPIC
AB 2215 (Bryan)	Pre-booking diversion by police officers
AB 2483 (Ting)	Post-conviction resentencing procedures
SB 1323 (Menjivar)	Competency to stand trial
SB 108 (Budget Act)	Continued MCRP funding
AB 3278 (Transportation)	License suspension clean-up

Committee staff testify regularly before the Legislature and the Committee's research and analysis of California's criminal legal system continues to be relied on by courts, including the California Supreme Court.¹²

UNUSED OFFENSES NOTE

In its two previous reports, the Committee provided extensive data on offenses which had not been used to make arrests or as the basis of convictions. Due to data limitations, the Committee is not updating this data this year but plans to issue a stand-alone report with this information in 2025.

DATA COLLECTION AND ANALYSIS

Since its inception, the Committee has prioritized the use of empirical research and data to inform its recommendations. The Legislature vested special authority in the Committee to receive data from state and local agencies.¹³

For the past 5 years, the Committee has been compiling one of the largest collections of criminal legal system administrative data in the country, and this Report relies on data provided by the California Department of Corrections and Rehabilitation and the California Department of Justice.

Data collected by the Committee was analyzed with the help of the California Policy Lab, a policy-focused research lab at the University of California, Berkeley, and the University of California, Los Angeles.

In addition to the analysis presented in this report, the Committee and California Policy Lab produced the following data reports in the last year:

- *California's Nickel Prior Enhancement and Recent Reforms* (December 2023)
- *Consecutive Sentencing in California* (February 2024)
- *The Short-Term Impacts of Bail Policy in Los Angeles* (August 2024)
- *Short Stays in Prison* (September 2024)
- *Who Benefits from Automatic Record Relief in California* (October 2024)

¹² See, e.g., *People v. Walker*, 16 Cal.5th 1024, 1037 (2024); *People v. Clark*, 15 Cal.4th 732, 761 (2024); *People v. Burgos*, 16 Cal.5th 1, 33–34 (2024) (dissenting opinion of Justice Evans); *People v. Hardin*, 15 Cal.5th 834, 888 (2024) (dissenting opinion of Justice Liu); *People v. O'Bannon*, 326 Cal.Rptr.3d 345, 349–350 (2024); *People v. Gray*, 101 Cal.App.4th 148, 162 (2024).

¹³ Government Code §§ 8286, 8286.5.

LANGUAGE AND TERMINOLOGY USED THROUGHOUT THIS REPORT

As in previous reports, this Report avoids using the term “inmate,” “prisoner,” or “offender.” Instead, the report uses “incarcerated person” and similar “person-first” language. Other official bodies have made similar choices about language,¹⁴ and the Committee encourages stakeholders – including those drafting legislation – to consider doing the same.

¹⁴ See, e.g., Alexandra Cox, *The Language of Incarceration*, *Incarceration*, 1(1), 3–4 (July 2020); Nancy G. LaVigne, *People First: Changing the Way We Talk About Those Touched by the Criminal Justice System*, Urban Institute, April 4, 2016; John E. Wetzl, *Pennsylvania Dept. of Corrections to Discard Terms ‘Offender,’ ‘Felon’ in Describing Ex-Prisoners*, *Washington Post*, May 26, 2016; Karol Mason, *Guest Post: Justice Dept. Agency to Alter Its Terminology for Released Convicts, to Ease Reentry*, *Washington Post*, May 4, 2016; Morgan Godwin and Charlotte West, *The Words Journalists Use Often Reduce Humans to the Crimes They Commit. 1. Harmonize and Clarify the Post-Conviction Processes for Showing Innocence and Wrongful Convictions

Harmonize and Clarify the Post-Conviction Processes for Showing Innocence and Wrongful Convictions

RECOMMENDATION

California’s post-conviction relief statutes have been amended regularly since 2014, which has resulted in a tangle of different standards. In addition, rigid procedural rules can prevent people from even being allowed to argue they are actually innocent of any crime, and even if a court concludes that the person did not commit a crime, prosecutors often have the ability to continue prosecution.

The Committee therefore recommends the following:

1. Specify a unified standard for post-conviction claims based on new evidence that allows relief if the defendant shows a reasonable probability that the outcome of the case would have been different considering the new or false evidence.
2. Allow habeas petitions and motions to vacate that offer new evidence of innocence to be considered by a court despite procedural bars if the defendant shows by a preponderance of the evidence that the outcome of the case would have been different.
3. Specify that one of the remedies available to a court in a habeas corpus proceeding or motion to vacate is a dismissal of charges that bars further prosecution.

RELEVANT STATUTES

Penal Code §§ 1473, 1473.5, 1473.6, 1473.7

BACKGROUND AND ANALYSIS

The primary way a person convicted of a crime establishes their innocence is by filing a petition for “habeas corpus.”¹⁵ Unlike a direct appeal from a conviction, which only challenges the evidence and rulings during pre-trial and trial proceedings, a habeas corpus petition allows a convicted person to present evidence to a court that was not previously considered. California’s habeas corpus statute was enacted in 1872 and not significantly amended until 1975, when claims of false evidence were added as a means to vacate a conviction.¹⁶ The statutory scheme was not updated again until 2014 but has been regularly amended since then — including creating parallel statutes for people no longer in custody to vacate their convictions¹⁷ — without any uniformity in the standards.

As a result of these changes, in order to vacate a conviction, some claims require showing (in order of difficulty for the petitioner) a “reasonable probability” of a different result,¹⁸ others require showing that a different result is “more likely than not”¹⁹ — that is, by a preponderance of evidence — and at least one path to relief requires evidence that “completely undermines the prosecution’s case, is conclusive, and points unerringly to [the person’s] innocence.”²⁰ It is also unclear what someone with new evidence of innocence must prove to have a conviction vacated if they are no longer in custody as the language for this type of petition is different from all the others.²¹

¹⁵ “Habeas corpus,” also known as the “Great Writ,” is a reference to the ancient writ of “habeas corpus ad subjiciendum,” which is Latin for “that you have the body to submit to.” See Legal Information Institute, “habeas corpus ad subjiciendum” definition. The writ was traditionally used to challenge the basis for the detention of the petitioner but has expanded over time. See *In re Clark*, 5 Cal.4th 750, 763–764 (1993). A habeas corpus petition can also be used to challenge denials of parole, prison or jail conditions, and denials of other rights. See, e.g., *In re Lawrence*, 44 Cal.4th 118.1 (2008) (denial of parole); *In re Von Staich*, 56 Cal.App.5th 53 (2020) (conditions); *In re Humphrey*, 11 Cal.5th 135 (2021) (bail).

¹⁶ Stats. 1975, c. 1047 (AB 48). This amendment codified, with some modification, the due process requirements of *Napue v. Illinois*, 360 U.S. 264 (1959). See Penal Code § 1473(b)(3).

¹⁷ See Penal Code §§ 1473.5, 1473.6, 1473.7.

¹⁸ See *In re Richards*, 63 Cal.4th 291, 312–313 (2016) (standard applies to false evidence claims under Penal Code § 1473(b)(1) and is the same used to evaluate state-law errors under *People v. Watson*, 46 Cal.2d 818 (1956)); *People v. Hendrix*, 13 Cal.5th 933, 944 (2022) (*Watson* “does not mean more likely than not, but merely a reasonable chance, more than an abstract possibility”).

¹⁹ Penal Code §§ 1473(b)(1)(C) & (D).

²⁰ Penal Code § 1473.6(a)(1).

²¹ Penal Code § 1473.7(a)(2). The statute specifies evidence that “requires vacation of the conviction or sentence as a matter of law or in the interests of justice.”

HABEAS CORPUS LEGAL STANDARDS				
Penal Code §	Scope	Custody?	Language	Burden
1473(b)(1)(A)	False evidence "introduced against a person at a hearing or trial relating to the person's incarceration"	In	"material on the issue of guilt or punishment"	Materiality
1473(b)(1)(B)	"False physical evidence ... which was a material factor directly related to the plea of guilty by the person"	In	"factual, probative, or material on the issue of guilt"	Materiality
1473(b)(1)(C)	New evidence "that has not previously been presented and heard at trial and has been discovered after trial"	In	"admissible, and is sufficiently material and credible that it more likely than not would have changed the outcome of the case"	Preponderance
1473.7(a)(2)	"Newly discovered evidence of actual innocence"	Out	"requires vacation of the conviction or sentence as a matter of law or in the interests of justice."	Unclear
1473.6(a)(1)	"Newly discovered evidence of fraud by a government official"	Out	"completely undermines the prosecution's case, is conclusive, and points unerringly to his or her innocence"	Unerring
1473.6(a)(2)	"Newly discovered evidence that a government official testified falsely at trial"	Out	"substantially probative on the issue of guilt or punishment"	Unclear
1473.6(a)(3)	"Newly discovered evidence of misconduct by a government official committed in the underlying case that resulted in fabrication of evidence"	Out	"substantially material and probative on the issue of guilt or punishment"	Unclear
1473(b)(1)(D)	Expert testimony: "significant dispute has emerged or further developed" about expert testimony "introduced at trial or a hearing"	In	"more likely than not affected the outcome of the case"	Preponderance
1473.5(a)	Expert testimony: related to intimate partner battering	Unclear, but limited to offenses before August 29, 1996	"reasonable probability, sufficient to undermine confidence in the judgment of conviction or sentence, that the result of the proceedings would have been different"	Materiality

California law should specify a unified standard for post-conviction claims based on new evidence (including claims based on a significant dispute about expert testimony).²² Such claims should allow vacatur of a conviction if the evidence shows there is a reasonable probability of a different outcome in the case. As explained to the Committee by Joe Trigilio, Executive Director of Loyola Project for the Innocent, in addition to simplifying the law, a unified standard would also protect pro se petitioners without counsel by ensuring judges are applying a uniform standard before counsel is assigned.²³

The recommended “reasonable probability” standard has already been applied in several contexts. It already applies to “false testimony” claims under the state habeas statute and is also used to assess state-law errors on appeal²⁴ and important federal constitutional rights, including the ineffective assistance of counsel²⁵ and claims that the prosecution did not disclose important evidence.²⁶

Habeas corpus petitions have historically been limited by complex procedural requirements. Under current law, a petition in a non-death-penalty case must be filed “as promptly as the circumstances allow.”²⁷ There are also strict rules on “successive” petitions, meaning a person cannot engage in “piecemeal litigation” and must bring all their claims at once.²⁸ Courts have only allowed a person to bring an untimely or successive habeas petition in four narrow circumstances, one of which is that the petitioner is “actually innocent”²⁹ – which requires the extremely high showing that “the evidence was such that it would undermine the entire prosecution case and point unerringly to innocence or reduced culpability.”³⁰

These procedural bars can result in people with meritorious claims of innocence being unable to get into court to vacate their convictions. A recent unsuccessful bill, AB 3088 (Friedman), would have eliminated these procedural bars by requiring courts to always consider a habeas petition if “in light of all of the evidence now before the court, it is more likely than not the outcome of the case would have been different.” A pragmatic standard like the one from AB 3088 complements the recommendation to harmonize the standards for relief. A person filing their first timely petition based on the grounds specified in the habeas statutes would need to demonstrate a “reasonable probability” that the outcome of the case would have been different. However, if the petition is untimely or successive, they would need to demonstrate with a higher burden – preponderance of the evidence – that the outcome of the case would have been different. This dynamic preserves the existing disfavor for multiple and untimely claims by imposing a higher burden of proof for successive petitions.

Finally, once a habeas petition is granted, courts typically only vacate the conviction and sentence – which means the prosecution has an opportunity to prosecute the case again. California courts are allowed to dismiss actions in furtherance of justice for a variety of circumstances under section 1385 and those dismissals are final if the court determines there is insufficient evidence showing the defendant committed the offense.³¹ While the California Supreme Court has held that courts have “broad authority to fashion appropriate relief for the claimed violation” in habeas corpus,³² the Penal Code should clarify that courts, at their discretion, after granting a habeas petition and vacating a conviction, may also dismiss the action in furtherance of justice and prevent further prosecution.

22 Penal Code § 1473(b)(1)(D).

23 Committee on Revision of the Penal Code, Meeting on September 6, 2024, Part 2, 0:28:22–0:29:35.

24 *People v. Hendrix*, 13 Cal.5th 933, 944 (2022).

25 *Strickland v. Washington*, 466 U.S. 668, 694 (1984).

26 *People v. Salazar*, 35 Cal.4th 1031, 1043 (2005).

27 *In re Douglas*, 200 Cal.App.4th 236, 242 (2011) (cleaned up).

28 *In re Clark*, 5 Cal.4th 750, 767 (1993) (cleaned up).

29 *Id.* at 797–798. A petitioner may also bring an untimely petition if they can show “error of constitutional magnitude led to a trial that was so fundamentally unfair that absent the error no reasonable judge or jury would have convicted the petitioner,” that they were convicted or sentenced under an invalid statute, or that the death penalty was imposed by a sentencing authority which had a grossly misleading profile of the petitioner.

30 *Id.* at 798, n. 33.

31 See *People v. Superior Court of Santa Clara County*, 100 Cal.App.5th 679, 698 (2024).

32 *In re A.R.*, 11 Cal.5th 234, 254 (2021) (citing *People v. Booth*, 3 Cal.App.5th 1284, 1312 (2016)). See also *In re Duval*, 44 Cal.App.5th 401, 411 (2020).

Convictions of innocent people present the most profound injustice in the criminal legal system and often reflect a total failure of the law enforcement, prosecutorial, defense, and judicial functions. They can also raise grave public safety issues – if the wrong person has been convicted in a serious case, the actually guilty person often remains free. Harmonizing the habeas standards, relaxing rigid procedural rules that prevent innocent people from getting into court, and allowing the court to dismiss a case so that it cannot be prosecuted again, will help correct these injustices.

EMPIRICAL RESEARCH

Even though the Legislature has expanded the availability of habeas corpus to more people and made relief more achievable in some scenarios – most notably with SB 1134, effective in 2017, which created a lower standard to vacate a conviction based on new evidence – the number of petitions filed in California’s Superior Courts has decreased in recent years, as shown in the chart below. Note that this data include *all* habeas corpus petitions – not just those seeking to vacate convictions because of innocence issues. For this reason, the increase in petitions in Fiscal Years 2019–2020 and 2020–21 may be due to petitions related to prison or jail conditions caused by the COVID-19 pandemic.³³

HABEAS CORPUS FILINGS IN SUPERIOR COURT (FY 2009–10 TO 2022–23)

Source: Judicial Council of California, 2020 Court Statistics Report, 88; Judicial Council of California, 2024 Court Statistics Report, 86. Note that SB 1134 became effective in January 2017 but this data is divided into Fiscal Years that begin midway through the calendar year.

In addition, though statewide data is incomplete, the number of habeas corpus petitions resolved with a hearing is a small percentage of filed petitions. In the most recent year of data, Fiscal Year 2022–23, only 356 petitions were resolved with a hearing, while more than 4,500 had been filed.³⁴ There is no data on the number of petitions granted or denied.

³³ See, e.g., *In re Von Staich*, 56 Cal.App.5th 53 (2020); 477 P.3d 537 (ordering reconsideration).

³⁴ Judicial Council of California, 2024 Court Statistics Report, Table 13d. The counties of Los Angeles, Sacramento, San Bernardino, San Diego, and San Francisco – and additional smaller counties – did not provide information on habeas corpus dispositions, though did provide the number of petitions filed. Petitions may not be resolved the same year as filing.

INSIGHTS FROM OTHER JURISDICTIONS

At least four other states – Maryland, Massachusetts, Utah, and Wisconsin – use a legal standard similar to reasonable probability for new evidence claims.³⁵

Other states also allow credible claims of innocence to proceed despite procedural flaws, including Connecticut and Utah.³⁶ And in Michigan, successive habeas petitions are allowed when there is a claim of new evidence or there is a significant possibility that the defendant is innocent of the crime.³⁷

³⁵ See Utah Code Ann. 1953 § 78B-9-104(2)(a); *State v. Plude*, 750 N.W.2d 42, 52 (Wis. 2008); Md. Code Ann. Crim. Proc. § 8-301(a)(1); *Comm. v. Weichell*, 847 N.E.2d 1080, 1090 (Mass. 2006). See also *Hunt v. State*, 474 Md. 89, 114 (Court of Appeals of Md. 2021).

³⁶ In Connecticut, a rebuttable presumption of delay without good cause generally applies when a petitioner files a subsequent habeas petition, but the presumption does not apply to claims asserting actual innocence. Conn. Gen. Stat. § 52-470(f). Utah law provides for a special innocence proceeding, separate from the general habeas law, in which a petitioner may present newly discovered material evidence that, if credible, would clearly establish their factual innocence. Utah Code § 78B-9-402(2)(a)(i).

2. Expand Post-Conviction Discovery

Expand Post-Conviction Discovery

RECOMMENDATION

The Penal Code provides a limited statutory right to post-conviction discovery for people sentenced to a term of 15 years or more. The statute should be updated to allow more efficient and broader access to information to show someone is innocent or has been wrongfully convicted.

The Committee therefore recommends the following:

1. Require prosecutors and law enforcement to disclose any favorable evidence discovered after conviction. “Favorable evidence” should be defined broadly, like it is in Texas, to include exculpatory, impeachment, or mitigating information that tends to negate the guilt of the person or tends to reduce the sentence, and should also include relevant rulings under the Racial Justice Act.
2. Allow a person convicted of a felony whose sentence included a period of incarceration greater than 1 year to obtain the prosecutor’s entire file, not just what they would have been entitled to at trial. This disclosure should also include jury selection notes, which should be specifically exempted from the definition of work product.
3. Allow prosecutors working in Conviction Integrity Units to use investigatory tools, including subpoenas, search warrants, and access to confidential law enforcement records.

RELEVANT STATUTES

Penal Code §§ 832.5, 832.7, 832.8, 1054.9, 1326, 1524
Evidence Code §§ 1043, 1045, 1560

BACKGROUND AND ANALYSIS

A petitioner seeking habeas corpus relief must provide evidence to support their claims or the court will quickly reject their petition. This evidence, which can come in various forms, can be difficult to obtain years after a conviction. The Penal Code should be updated to allow more efficient discovery of evidence by convicted people and prosecutors that can show someone is innocent or has been wrongfully convicted.

After conviction, Penal Code section 1054.9 provides a limited right to obtain documents and other evidence from prosecutors and law enforcement. After initially only applying to people sentenced to death or life without parole, the statute was expanded in 2019 to apply to people sentenced to at least 15 years for a serious or violent offense, although this threshold does not seem to be based on any particular sentencing data.³⁸ The defendant must have filed or be preparing to file a petition for habeas corpus (or if out of custody, a motion to vacate a conviction), must have tried to obtain the materials from trial counsel, and must pay the “actual costs of examination or copying.”³⁹

³⁸ Penal Code § 1054.9(a).

³⁹ Penal Code §§ 1054.9(a) & (e).

One problem with the discovery statute is that it only allows someone to obtain what they would have been entitled to at the time of trial.⁴⁰ In other words, there is no requirement that prosecutors and law enforcement disclose to convicted people favorable evidence from after trial, such as exculpatory evidence or material from successful Racial Justice Act claims. As Nisha Shah, the Deputy Director at the Habeas Corpus Resource Center, explained to the Committee, there is no way for a petitioner under the Racial Justice Act to discover other proven examples of bias, other than attorneys talking to each other.⁴¹ Prosecutor’s jury selection notes – which have been shown to contain evidence of racial bias in some cases⁴² – are also not easily obtainable by defendants after conviction because they can be considered “work product.”⁴³

California’s rules of ethics for attorneys help address parts of this problem but they are insufficient. Ethical rules require a prosecutor to make timely disclosures of any “new, credible and material evidence creating a reasonable likelihood that a convicted defendant did not commit an offense.”⁴⁴ Upon learning of the information, the prosecutor must promptly disclose the evidence to a court, to the defendant, and conduct an investigation. If the evidence establishes by clear and convincing evidence that a defendant was convicted for an offense they did not commit, the prosecutor must try to remedy the conviction.⁴⁵ But this ethics rule does not appear in the Penal Code and the California Supreme Court has not imposed such a requirement as a matter of constitutional law.⁴⁶ And the complex definition of favorable evidence in the ethics rule is overly-narrow and would not cover material related to sentencing or the Racial Justice Act.

Prosecutors in Conviction Integrity Units – which often review old convictions – have also encountered obstacles to efficiently investigating cases of innocence.⁴⁷ For example, until a habeas petition is filed by a petitioner, there is no active criminal case, and it may be difficult for prosecutors to subpoena documents, obtain search warrants, or get confidential records of police officers if misconduct is alleged.⁴⁸

Allowing people pursuing a habeas petition and prosecutors in Conviction Integrity Units access to more information will allow more efficient investigation of innocence claims.

INSIGHTS FROM OTHER JURISDICTIONS

Other states require more post-conviction discovery by law. North Carolina mandates open-file discovery to non-death-penalty defendants in post-conviction proceedings once they are represented by counsel.⁴⁹ Texas requires that prosecutors provide defendants with exculpatory, mitigating, or impeachment evidence even after trial, including material that “would tend to reduce the punishment for the offense charged.”⁵⁰

40 Penal Code § 1054.9(c) (“discovery materials’ means materials in the possession of the prosecution and law enforcement authorities to which the same defendant would have been entitled at time of trial”).

41 Committee on Revision of the Penal Code, Meeting on September 6, 2024, Part 2, 0:56:12–0:57:38.

43 *Box v. Superior Court*, 87 Cal.App.5th 60, 67 (2022) (defendant is entitled to discovery of the prosecution’s jury selection notes only after showing a prima facie case of racial bias during jury selection).

44 Rules of Professional Conduct, rule 3.8(f). California was also the first state to impose criminal penalties for prosecutors who intentionally and in bad faith withhold exculpatory material. Penal Code § 141.

45 Rules of Professional Conduct, rule 3.8(g).

46 Last year, the California Supreme Court held that a prosecutor’s duty to disclose favorable evidence as a matter of constitutional due process extends to habeas petitions, provided the evidence was known to or should have been known by the state at the time of trial. *In re Jenkins*, 14 Cal.5th 493, 527 (2023). The Court did not address what should happen when new exculpatory evidence is discovered after conviction. And the United States Supreme Court has held that a prosecutor does not have a post-conviction obligation to develop and disclose new exculpatory information that was not available at the time of the original trial, i.e. new DNA analysis. *District Attorney’s Office for Third Judicial Dist. v. Osborne*, 557 U.S. 52 (2009).

47 See Committee on Revision of the Penal Code, Meeting on September 6, 2024, Part 2, 0:17:05–0:18:11.

48 See, e.g., Penal Code §§ 1326, 832.7(a).

49 N.C. Gen. Stat. 15A-1415(f).

50 Texas Code Crim. Proc. § 39.14(h) (a defendant must receive “any exculpatory, impeachment, or mitigating document, item, or information in the possession, custody, or control of the state that tends to negate the guilt of the defendant or would tend to reduce the punishment for the offense charged.”) & (k).

3. Modernize Compensation for Innocent People

Modernize Compensation for Innocent People

RECOMMENDATION

California's system to compensate the innocent should match processes and rewards in other states and provide more equitable relief to innocent people.

The Committee therefore recommends the following:

1. Redraft the statutory compensation scheme to improve clarity, brevity, and consistency with other laws.
2. Apply the stream-lined process currently in place for convictions vacated through habeas corpus to acquittals after trial and convictions reversed on direct appeal for insufficient evidence.
3. Automatically adjust the compensation formula to account for inflation.
4. Allow people to claim individual and specific harms entitling them to more than the statutory rate of \$140 a day of incarceration.
5. Create a one-time lookback period that allows claimants who never filed a compensation claim or who did not receive compensation that would now be available to them under current law.
6. Compensate wrongfully convicted persons for other deprivations of liberty, including juvenile detention, involuntary hospitalization, and time spent on parole, probation, community supervision, and the sex offender registry.
7. Reimburse restitution, fines, fees, court costs, and other sums paid by the claimant that were required by the conviction and pay any child support arrears incurred due to the wrongful conviction.
8. Pay reasonable attorney fees and costs incurred in obtaining vacatur of the conviction and a successful compensation claim, including to pro bono attorneys.
9. Provide in-state tuition waivers for children of exonerees.
10. Allow a family member of the exoneree to pursue the claim after the death of the exoneree.

RELEVANT STATUTES

Penal Code §§ 851.8, 1485.55, 4900-4904

BACKGROUND AND ANALYSIS

Since 1942, California has offered, like a majority of states,⁵¹ compensation to people who were wrongfully convicted and have proven their innocence. The compensation process is often the only way that people may receive money that could correct the injustice of a wrongful conviction: only about one-third of exonerated people in California have been able to receive monetary compensation via a federal civil rights lawsuit.⁵²

California's process has evolved over time and, in some instances, can speedily award compensation for people who a court has found factually innocent. From 1970 to 2000 the maximum a person could receive was \$10,000; the rate increased in 2000 to a daily rate with no cap, and increased again in 2016.⁵³ Under current law, a person who has been convicted and incarcerated for a felony offense that they did not commit will be compensated for each day of wrongful incarceration at \$140 per day.⁵⁴ They have 10 years to bring a claim after an acquittal, dismissal of charges, pardon, or release from custody, whichever is later.⁵⁵

The compensation process is administered by the California Victim's Compensation Board (CalVCB).⁵⁶ In general, claimants must prove by a preponderance of the evidence that the crime they were convicted of did not occur or was not committed by them and that they were wrongfully incarcerated as a result.⁵⁷

In recent years, the Legislature has attempted to streamline the process in some circumstances. Since 2014, if a state or federal court has made a finding of factual innocence, CalVCB must approve compensation without a hearing within 90 days of a claim.⁵⁸ Since 2022, if there has been an acquittal or dismissal of charges after a conviction has been vacated in a habeas corpus proceeding, CalVCB must presumptively approve compensation, even without an express finding of factual innocence by a court.⁵⁹ The Attorney General can overcome this presumption with clear and convincing evidence that the claimant committed the offense.⁶⁰ Beginning this year, in similar circumstances, people can ask a court for a finding that they are entitled to compensation.⁶¹ The court must grant this request unless the District Attorney shows with clear and convincing evidence the person committed the offense.⁶²

While these changes have improved the efficiency of the process in certain circumstances, the changes have left some gaps in how compensation is determined. For example, a person whose conviction is overturned on direct appeal due to insufficient evidence is considered to be exonerated by the California Department of Corrections and Rehabilitation⁶³ and eligible for \$6,000 upon release to assist with reentry,⁶⁴ but not entitled to a presumption for compensation before CalVCB like they would be if their conviction had been vacated with a different procedure.

And as explored below, other states provide more holistic compensation. California should learn from these jurisdictions and update its process to more fully compensate exonerees.

51 See Innocence Project, *Key Provisions in Wrongful Compensation Laws* (May 2022) (38 states, the federal government, and Washington DC have laws to compensate the wrongfully convicted).

52 National Registry of Exonerations, *Compensation by the Numbers: Federal Civil Rights Lawsuit Compensation*, July 15, 2024. Of 276 exonerees, 94 (34%) have received awards, with 24 cases (9%) still pending.

53 From 1970 to 2000 the maximum someone could receive was \$10,000. In 2000, California began offering compensation at the rate of \$100 a day, with no cap. In 2016, this amount was raised to \$140 per day (\$51,100 a year).

54 Penal Code § 4904.

55 Penal Code § 4901(a).

56 Government Code § 13901(b). CalVCB — which consists of the Secretary of Government Operations, the State Controller, and a member appointed by the Governor — determines these claims at regular public meetings. The current gubernatorial appointee is Contra Costa County District Attorney Diane Becton.

57 Penal Code §§ 4900(a) & 4903(a); 2 C.C.R. §§ 644(d)(1) (burden of proof) & 640(f) (incarceration satisfies injury).

58 Penal Code §§ 1485.55(a), (c) & 4902(a). See also Penal Code § 851.865(a). Vacatur under Penal Code § 1473.7(a)(2) are not included in this process unless the person who has had their conviction vacated requests that the court make an express finding of innocence. Penal Code §§ 1485.55(b) & (c). A person making such a request must show "by a preponderance of the evidence that the crime with which they were charged was either not committed at all or, if committed, was not committed by the petitioner." Penal Code § 1485.55(b).

59 Penal Code § 4900(b). See Stats. 2021, c. 490 (S.B. 446).

60 Penal Code § 4902(d).

61 Penal Code § 1485.55(d).

62 Penal Code § 1485.55(d)(1).

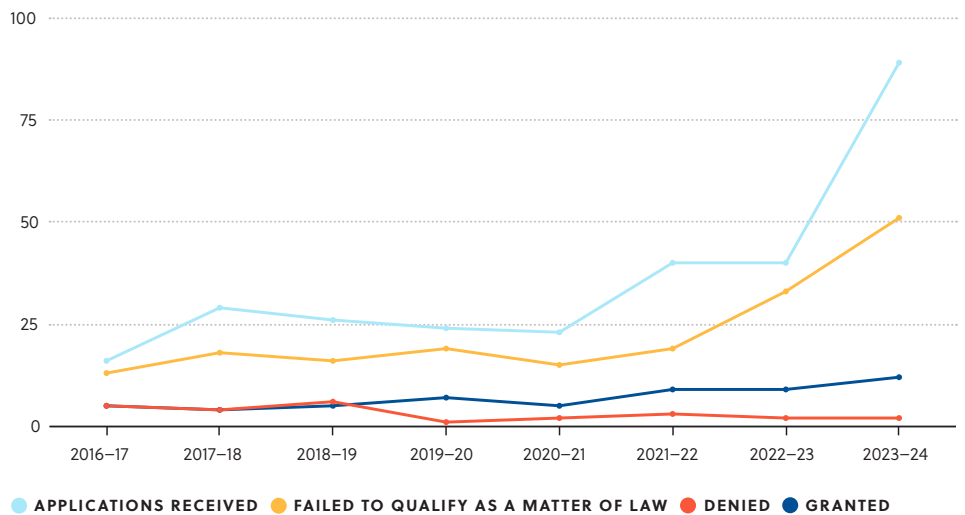

63 Penal Code § 3007.05(j)(1).

64 Penal Code § 3007.05(i).

EMPIRICAL RESEARCH

The number of claims filed with CalVCB has increased in recent years. For example, in Fiscal Year 2019–2020, 24 claims were submitted to CalVCB; in 2023–24 it was 89. Though many claims are dismissed soon after filing for failure to include sufficient information,⁶⁵ 87 people have been awarded compensation since 1997 for a total of \$63,502,920, with 46 of those claims granted since 2020.⁶⁶

INNOCENCE COMPENSATION CLAIMS AT CALVCB (FY 2016–17 TO 2023–24)

Source: California Victim Compensation Board. Claims may be considered in a different year than received. Applications that failed as a matter of law did not include all the information required by law.

Exonerees who were incarcerated for long sentences have also been deprived of the opportunity to build a legacy for themselves and their families.⁶⁷ They were not able to earn wages, build credit history, purchase a home, or help a child pay for college.⁶⁸ And many families accrue significant financial burdens during incarceration: in addition to having to fill the direct financial gaps left by the absence of their loved one, they may also pay for mental health support and phone calls and visits to the incarcerated person, among other costs.⁶⁹

⁶⁵ See 2 C.C.R. § 642(a) (hearing officer can dismiss claims “that are untimely or are otherwise not in compliance with Penal Code sections 4900 and 4901”).

INSIGHTS FROM OTHER JURISDICTIONS

California's compensation scheme has a clearly-defined formula for compensation based on time spent incarcerated and provides relatively quick payment if a court has found that someone is factually innocent. But it does not address an exoneree's full economic damages, such as loss of income or loss of earning potential, or harm to their families.

Other states provide broader compensation for exonerees and their families. In New York, a factually innocent person may claim damages that are specific to the harms the individual endured instead of a flat amount of compensation per day.⁷⁰ Other states also do the following:

- Adjusting compensation amounts for inflation.⁷¹
- Waiving tuition at state universities and educational institutions for exonerees and their children.⁷²
- Paying child support arrears accrued during the period of incarceration directly to the department responsible for collecting payments.⁷³
- Reimbursement of fines, fees, or restitution paid by successful claimants.⁷⁴
- Awarding reasonable attorney fees for bringing compensation claims.⁷⁵ Some states also reimburse attorneys for fees incurred working on overturning the wrongful conviction.⁷⁶
- Compensating for time spent on the sex offender registry, parole, probation, and other similar restraints on liberty.⁷⁷
- Paying economic damages, such as lost wages, and reimbursing medical and dental expenses incurred as a result of incarceration.⁷⁸
- Allowing for a look-back period for people who received compensation under a previous, more stringent law.⁷⁹
- Allowing a personal representative of the exoneree to pursue the claim after the death of the exoneree.⁸⁰

⁷⁰ New York requires the court to "award damages in such sum of money as the court determines will fairly and reasonably compensate" people. 860 N.Y. Court of Claims Act § 8-b." This may include awarding compensation for lost wages, physical or mental suffering, stigma attached to the type of conviction, presence or absence of a previous significant criminal history, and deprivation of a parenting role. See *Baba-Ali v. New York*, 878 N.Y.S.2d 555 (2009).

A. Create Judicial Diversion for First Time DUI Offenses	27
B. Expand the Use of DUI Collaborative Courts	30
C. Streamline License Suspensions Related to DUI	32

4. Improve California's Approach to Driving Under the Influence Offenses

Improve California's Approach to Driving Under the Influence Offenses

Driving under the influence of drugs or alcohol presents serious public safety concerns. According to data maintained by the Department of Motor Vehicles, in 2020, there were more than 1,900 alcohol- or drug-involved crash fatalities and at least 24,000 crash-injuries involving alcohol and drugs.⁸¹

ALCOHOL- AND DRUG-INVOLVED CRASH FATALITY RATE (1995–2020)

Source: California Department of Motor Vehicles, 2022 Annual Report Of The California DUI Management Information System, Figure 11; California Department of Finance, Population Estimates. "Drug-involved" rate includes fatalities that involved only drugs and those that involved drugs-and-alcohol.

California's criminal legal system plays an important role in addressing these offenses: between 2016 and 2020, law enforcement officers made almost 700,000 DUI arrests and more than 70% of those arrests resulted in a conviction.⁸² Convictions for first-time DUIs likely account for over 40% of all misdemeanor convictions in a given year.⁸³ The following related set of recommendations would improve road and public safety while also saving significant court and other costs.

⁸¹ California Department of Motor Vehicles, 2022 Annual Report of the California DUI Management Information System ("DUI MIS Report"), 76, Figure 11 (April 2023).
⁸² *Id.* at i, DUI Summary Statistics: 2010–2020.
⁸³ Judicial Council of California, 2021 Court Statistics Report, Tables 9a & 9c (212,291 misdemeanor guilty pleas in traffic and non-traffic cases occurred in Fiscal Year 2019–20); DUI MIS Report, 25, Table 5b (in 2019, there were 83,512 misdemeanor DUI convictions and 12,552 alcohol- or drug-involved reckless driving convictions).

A. Create Judicial Diversion for First-Time DUI Offenses

RECOMMENDATION

California law allows courts to divert most misdemeanor offenses to treatment instead of requiring a criminal conviction – but does not allow diversion for any misdemeanor DUI offenses, which account for nearly 100,000 convictions a year. Data shows that most people (70%) who are convicted of a first-time DUI offense are not convicted of another DUI offense in the future. Diverting first-time DUI offenses with strict requirements would allow the state to hold people accountable for impaired driving while freeing up needed court resources to focus on people with multiple DUIs.

The Committee therefore recommends the following:

- Direct judges to grant diversion for first-time DUI misdemeanor offenses as early in the court process as possible unless there are aggravating factors such as injury or having a minor in the vehicle.
- Require regular evaluation of court-mandated DUI programs and that programs offer reduced fees for low-income participants.

RELEVANT STATUTES

Penal Code §§ 1001.80, 1001.95–97
Vehicle Code §§ 23152, 23153, 23593, 23640

BACKGROUND AND ANALYSIS

While the number of DUI convictions per year has been declining over the last decade, there were still over 100,000 DUI convictions in 2019.⁸⁴ Approximately 64,000 convictions were for a first-time offense⁸⁵ and almost all people convicted of DUI offenses were sentenced to probation (96%); a large majority (74%) were also required to serve a jail sentence in addition to probation.⁸⁶

Diversion programs – which defer criminal proceedings while the charged person completes a set of obligations to earn a dismissal of the charges – are available for nearly all misdemeanor offenses in California at a judge’s discretion.⁸⁷ However, under current law, DUIs are not eligible for diversion, except for current or former members of the military.⁸⁸ Research shows that diversion for DUI can be more effective at reducing recidivism than the traditional criminal process,⁸⁹ and that an arrest is enough to deter most people convicted of a first-time DUI from reoffending.⁹⁰ As explained to the Committee by Lauren Knoth-Peterson, Senior Research Scientist for the Washington Public Safety and Policy Research Center, diverting first-time DUI offenses can help avoid the unique stigmatizing effects that a criminal conviction has on women and people of color.⁹¹

Moreover, recent legislation in California established automatic criminal record clearance for most misdemeanor convictions, including DUIs.⁹² The law allows the records of convictions to be “sealed,” meaning they are no longer accessible to third parties like employers or housing providers after people have completed the terms of their sentence and any probationary period.⁹³ Since the California Department of Justice began automatically clearing records in July 2022, over 12 million records have been

⁸⁴ *DUI MIS Report*, 21, Table 5a.

⁹² AB 1076 (2021).

⁹³ Penal Code § 1203.425.

relieved, and misdemeanor DUI convictions are the most common type (30%) of records relieved.⁹⁴ Diverting first-time DUI offenses would speed up the process already in place while incentivizing people to quickly complete their obligations and saving court costs.

Many of the current criminal penalties for a first-time DUI conviction, which include license suspension, orders to complete a DUI program, install an ignition interlock device, or pay a fine, should apply as conditions of diversion.

Therefore, the Committee recommends a misdemeanor DUI diversion law as follows:

- **Presumptive diversion for first DUIs except for aggravated cases.** While many first-time DUIs are suitable for diversion, it should not be available when the driver had a minor in the vehicle or injured someone.
- **Completion of all currently required classes and treatment.** Nearly all (90%) of people convicted of a first DUI are ordered to complete a 3 or 9-month DUI program. While the Committee recommends that any DUI diversion program continue this requirement, it notes that for many people, the high cost of the classes is a barrier to completion,⁹⁵ and currently none of the DUI program providers in the state offer a reduced fee for low-income participants, though that option is permitted by law.⁹⁶ To address this, the Committee recommends that the state require programs to offer reduced fees for low-income participants. Additionally, there is no strong evidence that these classes are effective in reducing DUI recidivism and the DMV has been unable to evaluate the programs' effectiveness due to data limitations,⁹⁷ so the state should require regular evaluation of their effectiveness.
- **Priorability.** A DUI charge dismissed because of diversion should count as the equivalent of a prior conviction in subsequent prosecutions for DUI. This would allow law enforcement and others to appropriately identify people who have a prior DUI and present a greater risk to public safety.⁹⁸
- **Watson advisement.** Similarly, people granted DUI diversion should be given a "Watson advisement," a warning courts are required to give to people convicted of DUI that a future DUI causing the death of another person could result in murder charges.⁹⁹
- **Discretionary ignition interlock devices.** Research on the effectiveness of requiring all people convicted of a DUI to install an IID is mixed. While several studies conducted in other states have found that installation of the devices reduced DUI recidivism during the period in which they were installed,¹⁰⁰ studies on the impact of a mandatory IID pilot program in California concluded that mandatory IID installation did not have a general or specific deterrent impact and that more research was needed to determine whether a mandatory IID law would be effective.¹⁰¹ Current law gives judges discretion to impose an IID upon a person convicted of a first-time DUI based on the facts of the case.¹⁰² A DUI diversion law should leave judges with this discretion.

See also California Department of Motor Vehicles, *Specific Deterrent Evaluation of the Ignition Interlock Pilot Program in California* (June 2016).

102 Vehicle Code § 23725.3.

Other states allow diversion for first-time DUIs and Ian Goldstein, Vice President of Public Affairs for the advocacy group Mothers Against Drunk Driving told the Committee that MADD supports diversion for DUI offenses when conditions such as mandatory installation of IIDs and exclusions for repeat offenses are in place.¹⁰³ Establishing presumptive diversion for most first-time DUI offenses ensures accountability while significantly reducing court costs and enhancing public safety. The Committee believes this recommendation will contribute to safer roads and effective deterrence and prioritize public safety and rehabilitation.

EMPIRICAL RESEARCH

In a 2021 study, researchers assessed the impacts of DUI diversion for first-time DUI offenses in Pennsylvania by examining nearly 35,000 cases in which diversion was granted.¹⁰⁴ The research found that there were no overall differences in the 4-year recidivism rates of people who were diverted compared to people who were not (indicating that granting diversion did not create an increased public safety risk) but that the harsher sanctions associated with a DUI conviction had particularly negative effects on women and people of color.¹⁰⁵ The research concluded that an arrest for DUI is a strong enough deterrent to keep most people from reoffending, without the need for additional, harsher punishments.¹⁰⁶

In California, over 70% of people convicted of a first-time DUI did not have another DUI within 15 years.¹⁰⁷ This data further supports the conclusion that allowing diversion for this group of people would not negatively impact public safety.

INSIGHTS FROM OTHER JURISDICTIONS

Diversion for DUIs is available in some states in some circumstances, including Florida,¹⁰⁸ Kansas,¹⁰⁹ Louisiana,¹¹⁰ Oregon,¹¹¹ Pennsylvania,¹¹² and Texas.¹¹³

B. Expand the Use of DUI Collaborative Courts

RECOMMENDATION

Collaborative courts provide substance abuse treatment and case monitoring in place of standard punishments for people convicted of repeat DUI offenses. While highly effective in reducing DUI recidivism, there is no statutory framework for DUI collaborative courts and most counties do not currently operate them.

The Committee therefore recommends the following:

Establish a statutory framework for DUI collaborative courts and offer funding to encourage counties to utilize them.

RELEVANT STATUTES

Vehicle Code §§ 23542, 23548, 23552

BACKGROUND AND ANALYSIS

California's criminal legal system can do more to address the high risk that repeat DUIs pose by prioritizing effective treatment over punitive measures. While most people who are convicted of a DUI in California do not reoffend, of the nearly 90,000 DUI convictions in 2019, 27%— approximately 24,000 convictions — were for repeat offenses.¹¹⁴

People convicted of multiple DUIs pose a higher risk of recidivating and are less likely to complete court-ordered DUI programs.¹¹⁵ They are also more likely to have an underlying alcohol or drug problem that is more effectively addressed through treatment than traditional criminal punishment.¹¹⁶ While current law requires courts to order people convicted of DUI to complete state-approved DUI programs,¹¹⁷ these programs typically provide education, evaluation, and supervision services, not treatment for underlying substance abuse disorders.¹¹⁸

Collaborative courts provide substance abuse treatment and ongoing case monitoring in place of standard punishments for people convicted of repeat DUI.¹¹⁹ Many use clinical assessments to screen for alcohol dependence and develop treatment plans that are implemented and monitored by a multidisciplinary, nonadversarial team that includes the court, attorneys, law enforcement, and community treatment and service agencies.¹²⁰ Participants in collaborative courts are incentivized to complete their programs through reduced or waived jail time, fines, and in some cases, shortened probation terms.¹²¹ Despite their effectiveness, due to limited funding and no statutory framework, only 20 counties operate DUI courts.¹²² While the California Office of Traffic Safety provides grants to support DUI courts, only 3 counties were provided funding in 2023.¹²³

The Committee heard from Superior Court judges across the state who preside over DUI collaborative courts. Judge Lawrence Brown, who oversees Sacramento County's collaborative courts, told the Committee that in addition to the cost savings DUI collaborative courts provide compared to incarceration, they strike a proper balance between treatment and accountability.¹²⁴ San Joaquin County Superior Court Judge Kristine Eagle also highlighted the effectiveness of the DUI collaborative court in her county but explained that these courts are entirely grant-funded.¹²⁵ Orange County

¹²³ California Office of Traffic Safety, *California Highway Safety Plan 2023*, 43–44 (2022).

¹²⁴ Committee on Revision of the Penal Code, Meeting on March 26, 2024, Part 2, 1:28:4—1:29:18.

¹²⁵ Committee on Revision of the Penal Code, Meeting on March 26, 2024, Part 2, 1:29:43—1:29:56.

Superior Court Judge Scott Cooper, who supervises collaborative courts in Orange County, told the Committee that in addition to the reduced recidivism and cost savings associated with DUI collaborative courts, many of his program participants overcome generational alcohol abuse by engaging in the services provided in collaborative court.¹²⁶

To expand access to these life-changing programs, the Committee recommends establishing a clear statutory framework and increasing funding support for DUI collaborative courts. This framework would specify that courts have the discretion to stay mandatory punishments for participants who complete their programs,¹²⁷ which would allow collaborative court stakeholders to more directly incentivize participants to stay on the path to recovery. The Committee's complementary recommendation to establish wide-spread diversion for first-time DUI offenses would free up needed resources for these specialized courts, allowing more counties to adopt or expand them.

By promoting accountability alongside rehabilitation, California can reduce DUI-related harm and support long-term community safety.

EMPIRICAL RESEARCH

Almost all people convicted of DUI are ordered to complete a state-approved DUI education program (91%).¹²⁸ Of those arrested for DUI in 2019 who were ordered by a court to enroll in a DUI program, 68% of people with a first conviction completed their program, but only 31% of people with a second conviction did.¹²⁹

Based on research showing that DUI collaborative courts are highly effective at reducing recidivism, the National Highway Traffic Safety Administration and the National Academy of Sciences have recommended that all states implement them.¹³⁰

¹²⁶ Committee on Revision of the Penal Code, Meeting on March 26, 2024, Part 2, 1:39:43–1:40:32.

¹²⁷ These include probation terms longer than standard probation terms, installation of ignition interlock devices, and jail time. See Vehicle Code §§ 23538, 23542, 23548, 23550 (jail sentence), 23575.3 (IID), 23600 (probation term).

C. Streamline License Suspensions Related to DUI

RECOMMENDATION

California law uses both administrative and criminal systems to suspend a person's license after they have been arrested and convicted of DUI. The use of the two systems results in duplicative license suspensions that are excessively punitive and not geared toward improving public safety.

The Committee therefore recommends the following:

Update the license suspension rules for DUIs so that a person's license is suspended only once and not multiple times.

RELEVANT STATUTES

Vehicle Code §§ 13351.85, 13353.3, 13353.6(h), 13353.7(b), 13353.75(c)

BACKGROUND AND ANALYSIS

Under current law, the California Department of Motor Vehicles uses an administrative process to suspend a person's license shortly after they are arrested for DUI, and in most cases, before the criminal case has been resolved.¹³¹ These suspensions last 4 months for a first DUI and 1 year for a second or subsequent DUI.¹³²

But in addition to the administrative suspension, after a person is convicted in criminal court – which can be several months after the arrest¹³³ – the DMV is required to suspend a person's license again ranging from 6 months for a first conviction to 5 years for a fourth or subsequent conviction, with no credit given for the administrative suspension.¹³⁴

License suspensions can cause people to lose jobs and hinder their ability to find new employment.¹³⁵ People who drive with a suspended license can be arrested, charged with a new criminal offense, fined, and subjected to continued criminal legal involvement.¹³⁶

Streamlining California's DUI license suspension process to eliminate redundant penalties can reduce barriers to employment and help minimize prolonged involvement in the criminal legal system, promoting individual stability and public safety.

¹³¹ Vehicle Code § 13353.3.

¹³² *Id.*

¹³³ DMV data show that the statewide median time from DUI arrest to conviction is approximately 4 months. See *DMV MIS Report*, Table 5b.

¹³⁵ See *Paying More for Being Poor*, Lawyers' Committee for Civil Rights of the San Francisco Bay Area, 7–8; (May 2017). See also *Stopped, Fined, Arrested: Racial Bias in Policing and Traffic Courts in California*, Back on the Road California, 26–28 (April 2016).

¹³⁶ Vehicle Code §§ 14601, 14601.2.

EMPIRICAL RESEARCH

A 2023 review of available research conducted by the National Highway Traffic Safety Administration found that:

- License suspensions are effective in reducing recidivism when imposed as swift and certain administrative sanctions, but less so when imposed after the lengthy and uncertain court process.¹³⁷
- Since some people continue to drive with a suspended license, and many do not reinstate their license when they become eligible, lengthy court-imposed suspensions do little to reduce DUI recidivism.¹³⁸ Encouraging people to quickly reinstate their licenses with appropriate conditions is a more effective way to promote road safety.¹³⁹

5. Simplify Civil Asset Forfeiture

Simplify Civil Asset Forfeiture

RECOMMENDATION

Asset forfeiture is a legal process that allows the state to keep cash and other property if it is connected to criminal activity. While state law puts some guardrails in place, due process protections for property owners can be minimal. California can improve the fairness of its asset forfeiture process by exempting minimum amounts of cash from being forfeited without an accompanying criminal conviction. It can also update who receives forfeited funds by allowing programs that support crime victims to receive some of the forfeited assets.

The Committee therefore recommends the following:

1. Exempt cash and property totaling less than \$10,000 from civil or administrative forfeiture.
2. Update the forfeiture distribution formula to allow proceeds to support crime victims.

RELEVANT STATUTES

Health & Safety Code §§ 11488.4, 11489

BACKGROUND AND ANALYSIS

California's asset forfeiture laws, like the laws of most states and the federal government, allow police and prosecutors to permanently keep cash, cars, homes, and other property that is involved in a crime. Asset forfeitures can happen as part of resolving criminal charges, but in many drug cases a conviction is not required and can instead occur as "civil" asset forfeiture. Forfeiture proceeds are distributed according to a statutory formula, but the formula does not allow proceeds to support crime victims.

In California, there is no minimum requirement on the value of property that can be forfeited — meaning that very small amounts of money can be taken, which may be difficult for a low-income person to challenge or not worth the cost to challenge in court. The Legislature's last significant engagement with asset forfeiture was in 2016 with the passage of SB 443 (Mitchell), which added some due process protections and limited when local law enforcement agencies could receive a share of federally forfeited property.¹⁴⁰

While California does require a criminal conviction for cash or property valued under \$40,000 in drug cases, this protection only applies if the owner of the property contests the forfeiture. If a person does not contest the forfeiture within 30 days — and data from 4 states that track the number of forfeitures contested shows only about 20% of forfeitures are contested¹⁴¹ — then prosecutors may take property under \$25,000 administratively, without any involvement by a judge, as long as they follow certain notice provisions.¹⁴² Judicial proceedings are required, however, when a person either contests the forfeiture of the property, or the total amount of property is above \$25,000.

¹⁴⁰ Forfeiture is also permissible under federal law and state agencies can receive a portion of the forfeiture if they are involved in the investigation that led to the forfeiture. In 2022, \$40.7 million more was received by California agencies for forfeitures under federal law. Department of the Treasury, *Treasury Forfeiture Fund, Accountability Report: Fiscal Year 2022*, 49; Department of Justice, *Equitable Sharing Payments of Cash and Sale Proceeds by Recipient Agency for California, Fiscal Year 2022*. SB 443 allows state agencies to participate in federal forfeitures only if those forfeitures meet the due process protections under state law. See Health & Safety Code § 11471.2. Federal law — which cannot be modified by state law — also controls how proceeds from asset forfeitures under federal law can be used. United States Department of Justice, *Guide to Equitable Sharing for State, Local, and Tribal Law Enforcement Agencies*, March 2024, 16.

¹⁴¹ Ian MacDougall, *Police Say Seizing Property Without Trial Helps Keep Crime Down. A New Study Shows They're Wrong.*, ProPublica, December 14, 2020 (only 1% of forfeitures were challenged in Colorado).

¹⁴² Health and Safety Code § 11488.4(j)(5)(B).

After assets are forfeited in drug cases – which make up the large majority of forfeiture cases – California law directs the majority of proceeds (65%) to the law enforcement agencies that participated in the forfeiture.¹⁴³ And 15% of that 65% must be set aside in a special local fund for programs to “combat drug abuse and divert gang activity.”¹⁴⁴ This set-aside – which amounted to approximately \$4 million in 2023 – should be modernized to also allow support for crime victims. Steven Jesse Corral, a prosecutor who leads asset forfeiture trainings with the California District Attorneys Association, appeared before the Committee and supported expanding who can receive forfeiture proceeds, especially to victims of human trafficking.¹⁴⁵

Civil asset forfeiture, without legal limits, can raise significant due process concerns, especially when a property owner does not have the means or resources to contest the forfeiture. Setting reasonable thresholds for when a prosecutor may permanently forfeit property without a criminal conviction will provide property owners with more due process.

EMPIRICAL RESEARCH

From 2018 to 2023, more than \$186 million across approximately 11,400 drug cases was forfeited in California under state law.¹⁴⁶ The smallest amount forfeited was \$1 and the largest was \$5,442,850; 13% of forfeitures were for less than \$1,000, 24% were for less than \$1,500, 39% were for less than \$2,500, and 74% were for less than \$10,000.

But the total amount of funds represented by these lesser forfeitures is small: the money forfeited in amounts under \$10,000 (\$26.3 million) was only 14% of the total amount forfeited from 2018 to 2023. In other words, requiring a minimum amount before civil forfeiture can occur in drug cases would help protect due process and reduce court and law enforcement costs with likely little bottom-line impact in the amount of money received.

Additionally, setting a minimum threshold for civil forfeiture in California would not prohibit a prosecutor from forfeiting amounts under \$10,000 altogether: prosecutors could still do so by obtaining a criminal conviction.¹⁴⁷ Of all forfeitures completed between 2018 and 2023 that were for \$10,000 or less, at least 50% were completed with a guilty plea in a criminal case.¹⁴⁸

INSIGHTS FROM OTHER JURISDICTIONS

Other states have taken similar steps to limit civil forfeiture. In 2021, Minnesota passed legislation that prohibits prosecutors from administratively forfeiting cash less than \$1,500.¹⁴⁹ The State Auditor, which is responsible for tracking forfeiture in Minnesota, explained that forfeitures of small-dollar assets are not a large part of public safety budgets, but the amounts forfeited can be significant to individuals.¹⁵⁰ Four other states – Maine, Nebraska, New Mexico, and North Carolina – have eliminated civil forfeiture and only allow criminal forfeiture.¹⁵¹

¹⁴³ Health and Safety Code § 11489(b)(2)(D). The funds are distributed as follows: 65% to the law enforcement agencies that participated in the forfeiture, 15% of this must be deposited in a special local fund for programs “designed to combat drug abuse and divert gang activity”; 10% to the prosecutorial agency that processes forfeiture action; 24% to the state General Fund, of which up to \$10 million shall be made available for school safety and security; and 1% to the Environmental Enforcement and Training Account.

¹⁴⁴ Health & Safety Code § 11489(b)(2)(A)(i).

6. Establish Prosecutor-Led Diversion for Gun Possession Offenses

Establish Prosecutor-Led Diversion for Gun Possession Offenses

RECOMMENDATION

The Penal Code authorizes judge-initiated diversion for most misdemeanor offenses including gun possession. However, judge-initiated diversion is not available for felony charges, and while prosecutors can offer diversion in either misdemeanor or felony gun possession cases, their authority to do so is not explicitly authorized in the Penal Code.

The Committee therefore recommends the following:

Explicitly allow prosecutors to offer diversion programs to individuals charged with misdemeanor and felony gun possession offenses.

RELEVANT STATUTES

Penal Code §§ 1001.95, 25400, 25850, 26100, 26350

BACKGROUND AND ANALYSIS

Research shows that community gun violence is committed by a relatively small number of people. An analysis of data from nearly two dozen cities across the United States found that on average, at least half of homicides and nonfatal shootings in these cities were committed by and/or against people accounting for less than 1% of the city population.¹⁵²

Despite this, arrests for weapons possession are common, accounting for nearly 10% of arrests each year in California.¹⁵³ These arrests often result in jail or prison sentences, even though many people carry firearms solely for personal safety, without any intent to engage in further criminal activity.¹⁵⁴ Incarcerating these individuals frequently intensifies the conditions linked to community violence, such as poverty, poor access to education, untreated trauma, and lack of affordable housing.¹⁵⁵ Even convictions that avoid jail time have been shown to produce significant, long-lasting increases in recidivism.¹⁵⁶

As Mike McLively, Policy Director at the Giffords Center for Violence Intervention explained to the Committee, some communities are countering this cycle through prosecutor-led gun diversion programs.¹⁵⁷ These initiatives have shown promising results by addressing root causes and reducing recidivism.

While current law does not explicitly prohibit diversion for unlawful gun possession, and judges may grant diversion in misdemeanor cases despite opposition from prosecutors,¹⁵⁸ judges and prosecutors can be reluctant to offer diversion due to public safety concerns.¹⁵⁹ Additionally, many may be unaware of these innovative programs and some communities have yet to develop community-based programs tailored to unlawful gun possession.

The Penal Code should be updated to expressly permit prosecutors to offer diversion for gun possession offenses, including carrying a concealed firearm, carrying an unloaded firearm, and carrying a loaded firearm in public or in a vehicle.¹⁶⁰ The law should specify eligibility for diversion when unlawful gun possession is the sole charge, regardless of whether it is classified as a misdemeanor or felony.

¹⁵⁶ John Humphries, et al., *Understanding the Revolving Door of Conviction, Incarceration, and Recidivism*, Cato Institute, October 30, 2024.

¹⁵⁷ See Written Submission of Mike McLively to Committee on Revision of the Penal Code, July 9, 2024.

¹⁵⁸ Penal Code § 1001.95.

¹⁵⁹ See, e.g., San Luis Obispo Superior Court, *Court Misdemeanor Diversion Guidelines* (categorically prohibits gun possession offenses from court-initiated misdemeanor diversion).

¹⁶⁰ See Penal Code §§ 25400 (concealed), 25850 (loaded in public), 26100 (loaded in a vehicle), 26350 (unloaded).

By adopting a clear legal framework that allows for prosecutor-led diversion for unlawful gun possession, California can break cycles of incarceration, address the root causes of violence, and foster safer communities. Embracing these evidence-based approaches would be a meaningful step toward reducing gun violence while supporting individuals in high-violence communities.

EMPIRICAL RESEARCH

A University of Chicago study of a gun diversion program in Minneapolis found that graduates of the program had significantly lower odds of a violent or weapons-related offense compared to the comparison group.¹⁶¹ The program, developed through collaboration between the local prosecutor and a trusted community-based organization, offers life skills classes, mentoring, and other support services to people charged with misdemeanor gun possession offenses as an alternative to conviction and incarceration.¹⁶² Over 6 to 9 months, trained counselors use a mix of cognitive behavioral and group therapy to address trauma, faulty thinking, and the ability to regulate one's emotions.¹⁶³ Researchers found that only 13% of program graduates were convicted of a new offense within two years compared to 40% of the comparison group.¹⁶⁴

Recommendation	41
Relevant Statutes	41
Background and Analysis	41
Empirical Research	43
Additional Considerations	44

7. Eliminate Accomplice Liability for Implied Malice Murder

Eliminate Accomplice Liability for Implied Malice Murder

RECOMMENDATION

Recent legislation, SB 1437, limited accomplice liability for murder based on the principle that a person should only be punished for their own actions and personal culpability. However, a once-obscure legal theory – aiding and abetting implied malice murder – allows people who did not kill or intend to kill to be found guilty of murder, inconsistent with this principle.

The Committee therefore recommends the following:

Eliminate murder liability for aiding and abetting implied malice murder.

RELEVANT STATUTES

Penal Code §§ 188, 189

BACKGROUND AND ANALYSIS

This year, the Committee began a review of California’s accomplice liability laws – legal doctrines that allow someone who did not directly commit an offense to be convicted and punished as if they had.¹⁶⁵ The Committee is concerned that the scope of these doctrines may often impose punishments incommensurate with an accomplice’s actual culpability. The Committee intends to return to this general topic with additional study, but this year has focused on issues arising from accomplice liability for murder, which raise immediate concerns following recent court rulings approving a confusing legal standard applied to accomplices in “implied malice” murder cases. The Committee urges the Legislature to address these issues as follow-up to its landmark efforts in this area with SB 1437 in 2018.

Murder convictions in California carry the most severe penalties in our criminal legal system: indeterminate sentences of 15 years to life, 25 years to life, or, in some cases, imprisonment for life without the possibility of parole or even death.¹⁶⁶

Recognizing the gravity of these penalties, the Legislature recently affirmed with SB 1437 that murder convictions should be limited to individuals who actually committed the killing, aided in the killing with the shared intent to kill, or acted as a major participant in a specified felony with reckless indifference to human life.¹⁶⁷ Before SB 1437, California applied murder liability much more broadly, allowing accomplices who acted without the intent to kill and who were not directly involved in the killing to be convicted of murder.¹⁶⁸ This broader liability was often based on legal theories that relaxed requirements around proving the individual’s mental state regarding the killing.¹⁶⁹

Two legal theories in particular, the felony-murder and natural and probable consequences doctrines, were frequently used to convict accomplices of murder that they did not directly participate in or intend. The second-degree felony-murder rule permitted murder convictions for accomplices to “inherently dangerous” felonies, regardless of intent,¹⁷⁰ while the natural and probable consequences doctrine applied a “reasonably foreseeable” standard to hold accomplices liable for murders that resulted from an offense they aided.¹⁷¹ Notably, these doctrines did not require prosecutors to prove the accused person’s state of mind regarding the killing itself.¹⁷²

¹⁶⁵ See Penal Code § 31.

¹⁶⁶ Penal Code §§ 190(a) & 190.2.

¹⁶⁷ SB 1437 (Skinner 2018).

¹⁶⁸ See *People v. Chun*, 45 Cal.4th 1172 (2009); *People v. Cavitt*, 33 Cal.4th 187.

¹⁶⁹ See *People v. Dillon*, 34 Cal.3d 441, 476–477 (1983).

¹⁷⁰ *People v. Chun*, 45 Cal.4th 1172, 1182 (2009); *People v. Patterson*, 49 Cal.3d 615, 617–618 (1989) (in determining whether a felony is inherently dangerous to human life, fact-finder must consider the elements of the felony in the abstract, not the particular facts of the case (citing *People v. Williams*, 63 Cal.2d 452, 458 (1965))).

¹⁷¹ *People v. Prettyman*, 14 Cal.4th 248, 254 (1996). In 2014, the California Supreme Court specified that natural and probable consequences liability could not extend to first-degree premeditated murder because doing so was “inconsistent with reasonable concepts of culpability.” *People v. Chiu*, 59 Cal.4th 155 (2014).

¹⁷² See *People v. Dillon*, 34 Cal.3d 441, 476–477 (1983) (felony-murder rule); *People v. Prettyman*, 14 Cal.4th 248, 254 (1996) (natural and probable consequences doctrine).

In 2019, SB 1437 (Skinner 2018) made significant reforms that limited the application of these doctrines, restoring a core legal principle that punishment should reflect an individual's personal level of culpability.¹⁷³ SB 1437 eliminated both the second-degree felony-murder rule and natural and probable consequences doctrine as grounds for murder liability.¹⁷⁴ It also created a process for people convicted of murder under these theories to petition to vacate their convictions.¹⁷⁵ Despite these reforms, current law still allows murder liability for accomplices under certain conditions, such as when they assist in a murder with intent to kill or engage in an enumerated felony as a major participant with reckless indifference to human life.¹⁷⁶

In addition to these well-established legal theories, a novel theory to establish accomplice liability for murder developed after SB 1437 – aiding and abetting implied malice murder. Under this theory, a person who assists in a life-endangering act with conscious disregard for human life can be convicted of murder even if they did not directly participate in or intend the killing.¹⁷⁷ This theory was fully-approved by the California Supreme Court in a June 2023 case¹⁷⁸ that has since been cited in appellate courts more than 200 times.¹⁷⁹ The theory has allowed murder convictions in cases with similar fact patterns as those previously prosecuted under the felony-murder and natural and probable consequences doctrines. For example, it has supported murder prosecutions for accomplices who neither committed the fatal act nor anticipated that a weapon would be used.¹⁸⁰

As explained to the Committee by Jennifer Hansen, an attorney at the California Appellate Project, in addition to being inconsistent with the goals of SB 1437, the elements of aiding and abetting implied malice murder are complex and can be difficult for courts and juries to apply, which raises serious questions about using this theory to impose the most serious sentences in our system.

Additional reforms are needed to align accomplice liability for murder with the objectives of SB 1437. The Committee therefore recommends abolishing aiding and abetting implied malice murder to ensure that only those who act with the highest culpability face murder convictions and their accompanying life sentences.

Eliminating this theory does not eliminate criminal liability for accomplices altogether. Accomplices will still be held accountable for serious offenses they participated in, such as assault or burglary, often with substantial sentencing enhancements. Other legal standards would continue to apply to those who intend or directly participate in killings. The Committee affirms, however, that murder convictions and indeterminate life sentences should be reserved for the most culpable individuals and not applied to accomplices who lacked an intent to kill.

EMPIRICAL RESEARCH

The resentencing provisions of SB 1437 created a process for people convicted of murder to petition to vacate their conviction if it was based on the felony-murder or natural and probable consequences doctrines.¹⁸¹

Research conducted by the California Policy Lab for the Committee shows that people released after being resentenced under SB 1437 have very low reconviction rates: only 3.4% were convicted of a new offense within one year of release and only 11% were convicted of a new offense after three years, with most of the new convictions being for misdemeanors.¹⁸²

NEW CONVICTION RATES FOR PEOPLE RELEASED UNDER SB 1437

Source: California Policy Lab analysis of CDCR and DOJ data. Data is suppressed if the number of people convicted is less than 10. After two years, 4.2% of people were convicted of misdemeanors. After 3 years, 6.8% of people were convicted of misdemeanors and 4.4% were convicted of felonies.

People who have been resentenced and released under SB 1437 are disproportionately Black and female compared with other resentenced populations: 40% of the SB 1437 population was Black (compared to 24% of people released from CDCR in Fiscal Year 19–18) and 12.4% were women (compared to 7.3%).¹⁸³ They were also younger at the time of their offense and had served longer sentences comparatively, with a median age at offense of 21 and time served at release of 17 years.¹⁸⁴

184 *Id.*

ADDITIONAL CONSIDERATIONS

Under the resentencing provisions of SB 1437, petitioners must be denied relief if they could be convicted of murder under a still-valid theory.¹⁸⁵ As a result, resentencing relief has been denied to people convicted of first-degree murder even though their conviction is no longer valid under current law on the basis that there is sufficient evidence to convict them of a lesser degree of murder.¹⁸⁶ For example, a person convicted of first-degree felony murder, who would not be guilty under current law because they weren't a major participant in the underlying felony who acted with reckless indifference to human life, could have their petition denied, and the first-degree murder conviction left in place if they could be convicted of second-degree murder under the aiding and abetting implied malice theory.

One court has noted that this results in “rough justice rather than perfect justice” and that the Legislature could amend the Penal Code “to ensure that no defendant remains convicted of a crime greater than what he or she would be guilty of under the revised statutes.”¹⁸⁷

The Committee recommends that these resentencing provisions be amended to allow judges to reduce murder convictions and sentences to the appropriate degree so that no person remains convicted of a crime greater than current law would allow. The law should also allow people whose SB 1437 petitions were denied on the ground that they could be convicted of a lesser degree of murder to return to court for reconsideration of their petition.

In addition, if accomplice liability for implied malice murder is eliminated, people who have been denied relief under SB 1437 on that theory should be able to have their cases reconsidered by a court to determine if their murder convictions should still stand.

Background and Analysis	46
Empirical Research	47
Additional Considerations	47

8. Limit Firearm Enhancements to People Who Used or Were Armed With a Gun

Limit Firearm Enhancements to People Who Used or Were Armed With a Gun

RECOMMENDATION

Two firearm enhancements in the Penal Code – the “armed” and “use” enhancements – can be applied to accomplices who did not know another person had or was going to use a gun. These enhancements can significantly lengthen a person’s prison sentence even though their lack of involvement reduces their culpability.

The Committee therefore recommends the following:

- Require accomplices to be personally armed with a gun for the “armed” enhancement to apply.
- Eliminate the exception in gang cases to the requirement that a person must personally use or discharge a firearm for the “use” enhancement to apply.

RELEVANT STATUTES

Penal Code §§ 12022, 12022.53

BACKGROUND AND ANALYSIS

Armed enhancement • Penal Code § 12022

The “armed” firearm enhancement adds 1 year to a sentence for being armed with a firearm during the commission or attempted commission of any felony and 3 years when the firearm is an assault weapon or machine gun.¹⁸⁸ The enhancement does not require a gun to actually be on someone’s person before it can apply: a gun must merely be “available for use, either offensively or defensively.”¹⁸⁹ Courts have held that multiple people can be “armed” with a single gun for the purposes of this enhancement.¹⁹⁰

Under current law, the armed enhancement applies not only to individuals who were personally armed but also to accomplices who may not have been aware that another principal was armed.¹⁹¹ For example, a getaway driver for a robbery can receive this enhancement even if they did not know that the individuals who completed the robbery were armed with guns.¹⁹²

“10-20-life” use enhancement • Penal Code § 12022.53

The Penal Code also includes a separate sentence enhancement for personal use or discharge of a firearm during certain specified felonies, commonly referred to as the “10-20-life” gun enhancement.¹⁹³ This enhancement imposes a consecutive term of 10 years for using a firearm, 20 years for personally and intentionally discharging it, and 25 to life if the discharge causes great bodily injury or death.¹⁹⁴

Unlike the “armed” enhancement, this enhancement generally does not apply to accomplices who did not personally use the firearm.¹⁹⁵ However, an exception exists for cases where a gang enhancement is also proven. In these instances, the “use” enhancement can be applied to accomplices even if they were unaware that the perpetrator used or intended to use a firearm.¹⁹⁶ The effect of this rule is that

¹⁸⁸ Penal Code § 12022(a)(1), (2). The arming enhancement cannot be applied to offenses in which possession of a gun is an element of the offense. See *Ex parte Shull*, 23 Cal.2d 745, 749-751 (1994); *People v. Clark*, 62 Cal.App.5th 939 (2021).

¹⁸⁹ *People v. Pitto*, 43 Cal.4th 228, 236 (2008).

¹⁹⁰ See *People v. Mendival*, 2 Cal.App.4th 562 (1992).

¹⁹¹ *Alfred v. Garland*, 64 F.4th 1025, 1046 (9th Cir. 2023); *People v. Caraballo*, 246 Cal.App.4th 936, 940 (2016); *People v. Overten*, 28 Cal. App.4th 1497, 1501 (1994). See also *People v. W.L.*, 2018 WL 6499446, *7 (First Appellate District 2018); *People v. Withers*, 2018 WL 4611146 (Fourth Appellate District 2018); *People v. Jurian*, 2018 WL 1100763, *19 (Second Appellate District 2018).

¹⁹² *People v. Overten*, 28 Cal.App.4th 1497, 1501 (1994).

¹⁹³ Penal Code § 12022.53. The distinction between gun “use” and being “armed” is whether the person took some action — not necessarily firing the weapon — with the gun in furtherance of the crime; if so, the gun was “used.” See *Alvarado v. Superior Court*, 146 Cal.App.4th 993 (2007).

¹⁹⁴ *Id.* A person can receive multiple enhancements for one occasion in which they used or discharged a firearm if they are convicted of multiple charges based on multiple victims. In *re Tameka C.*, 22 Cal.4th 190, 195–198 (2000).

¹⁹⁵ *People v. Walker*, 18 Cal.3d 232 (1976).

¹⁹⁶ Penal Code § 12022.53(e). See also *People v. Gonzales*, 87 Cal. App.4th 1, 11–19 (2001).

someone who did not personally use a firearm in a gang-related case can receive a gun enhancement carrying a 20-year or life sentence.¹⁹⁷

The Committee has concluded that these enhancements as can be currently applied to accomplices in the circumstances described above are not fair and do not result in appropriate sentences. To ensure that sentencing enhancements align with individual culpability, the Committee recommends that firearm enhancements be reserved for individuals who directly used or were knowingly armed with a firearm. This approach would reduce excessively harsh penalties for individuals with lesser involvement in the crime.

EMPIRICAL RESEARCH

Armed enhancement: Data from the California Department of Corrections and Rehabilitation show that from 2013 to 2023, there were approximately 2,000 people admitted to prison with the armed enhancement as part of their sentence. Unfortunately, the data does not distinguish between directly armed people and those who may have received the enhancement as an accomplice. There were significant race and age disparities: 87% of people with the enhancement were non-white and nearly 50% were 25 years old or younger when they were admitted to prison.

Use enhancement with gang enhancement: Data shows that from 2013 to 2023, 603 people were admitted to prison with both the “10-20-life” firearm use enhancement and a gang enhancement. Of these, 108 people may have received the gun enhancement as an accomplice.¹⁹⁸ Of all people receiving both enhancements, nearly all of them (99%) were Black or Hispanic, nearly half of them were 25 years old or younger at the time they were admitted to prison (45%), and 98% were 39 or younger.¹⁹⁹

ADDITIONAL CONSIDERATIONS

As the Committee has routinely recommended, any changes to the application of sentencing enhancements should be applied retroactively to ensure equal treatment of people currently incarcerated on an enhancement that would not be allowed under current law.

¹⁹⁷ The gang enhancement and personal use of a firearm enhancement cannot be added together unless the person is the actual shooter. Penal Code § 12022.53(e)(2).

¹⁹⁸ A person cannot receive an additional sentence for both the gang enhancement and personal use of a firearm enhancement unless they were the actual shooter. Penal Code § 12022.53(e)(2). The data show that 108 people were convicted of both enhancements but sentenced on only one, suggesting that they were convicted as accomplices who did not actually use a gun.

¹⁹⁹ For an additional 28 people, neither enhancement added time to the sentence.

9. Prohibit the Felony- Murder Rule in Provocative-Act Murders

Prohibit the Felony-Murder Rule in Provocative-Act Murders

RECOMMENDATION

California’s “provocative act” murder doctrine holds people responsible for murders they did not directly commit or intend if their dangerous actions provoke a deadly response by another. This already expansive liability is further intensified by California’s felony-murder rule, which can escalate these cases to the most severe penalties in the legal system.

The Committee therefore recommends the following:

Prohibit the felony-murder rule from elevating a murder conviction based on the provocative-act doctrine from second-degree to first-degree murder.

RELEVANT STATUTES

Penal Code §§ 189, 190.2

BACKGROUND AND ANALYSIS

California courts have long allowed a person to be convicted of murder if they commit or assist a “provocative act” – a violent or aggressive action during the crime likely to provoke a deadly response – which leads to someone else (such as a crime victim or police officer) killing someone in response.²⁰⁰ For example, a person who initiates a gun battle can be convicted of murder if a third-party kills someone in response, even if that person was not directly involved in the killing or if the person killed was also an accomplice to the crime.²⁰¹ Courts have held that the provocative act murder doctrine is a valid legal theory even after the changes made to murder liability by SB 1437 in 2019.²⁰²

The provocative act doctrine differs from the felony-murder rule because it involves a third-party’s lethal response, rather than a direct killing by a perpetrator or accomplice during a felony.²⁰³ Courts have held that the felony-murder rule cannot be used to establish murder liability when a third-party causes the death, even if the situation arose during a felony that could otherwise trigger it.²⁰⁴

But confusingly, once second-degree murder liability is established under the provocative act doctrine, the felony-murder rule can elevate the offense to first-degree murder if the underlying crime is among those enumerated in statute.²⁰⁵ This elevation opens the door to even harsher sentences, including life without the possibility of parole or the death penalty, based on the felony-murder special circumstance, despite the individual neither directly causing nor intending the fatal outcome.²⁰⁶

These rules allow someone who did not directly kill and did not intend to kill to be sentenced to life without parole or even death because of a third-party’s response to their actions. Although the number of convictions in such cases appears to be small – only a few dozen according to appellate attorney Nathaniel Miller, who appeared before the Committee²⁰⁷ – the outcomes in these cases involve disproportionately severe penalties for people whose level of culpability does not warrant such extreme punishments.

²⁰⁴ *People v. Washington*, 62 Cal.2d 777, 781–783 (1965).

²⁰⁵ Penal Code § 189(a); *People v. Gilbert*, 63 Cal.2d 690 (1965). See also *Pizano v. Superior Court*, 21 Cal.3d 128, 139, 4 (1978).

²⁰⁶ Penal Code § 190.2(a)(17); *People v. Briscoe*, 92 Cal.App.4th 568, 595 (2001).

²⁰⁷ Committee on Revision of the Penal Code, Meeting on October 29, 2024, Part 2 1:16:40–1:17:13.

To ensure fairness, the Committee recommends that the Legislature amend the law to prohibit using the felony-murder rule to elevate a murder conviction based on the provocative-act doctrine from second-degree to first-degree murder. This change would align punishment more closely with the defendant's actual actions and intentions.

INSIGHTS FROM OTHER JURISDICTIONS

Most states, like California, do not allow the felony-murder rule to establish murder liability for killings committed by a non-accomplice third-party.²⁰⁸ However, unlike in California, several states impose additional limitations. Some, like New York and Missouri, allow the use of the felony-murder rule but restrict liability to second-degree murder,²⁰⁹ while others, like Michigan, Nevada, and Pennsylvania prohibit murder convictions when the person killed is an accomplice.²¹⁰ Certain states including Maryland and Massachusetts, go further, barring all murder liability when the killing is committed by a third-party.²¹¹ In states with any of these limitations, using the felony-murder rule to impose first-degree murder liability is prohibited.

10. Specify that Proposition 57 Credits Apply to Indeterminate Sentences

Specify that Proposition 57 Credits Apply to Indeterminate Sentences

RECOMMENDATION

Beginning in 2017, people incarcerated with a life sentence could earn credits for both good conduct and completion of educational and other programs, which improve public safety by incentivizing good behavior and rehabilitation. Recent litigation has resulted in CDCR being unable to release people with indeterminate sentences who had earned earlier parole eligibility dates with these credits and been approved for release by the parole board because they are a low risk to public safety.

The Committee therefore recommends the following:

Specify in the Penal Code that the credits created under Proposition 57's constitutional provisions should continue to be applied to minimum eligible parole dates.

RELEVANT STATUTES

California Constitution, Article 1 § 32
Penal Code § 3046
15 California Code of Regulations §§ 3043–3043.6

BACKGROUND AND ANALYSIS

A recent court decision interpreting the scope of Proposition 57's amendments to the California constitution has upended the parole process for people with indeterminate life sentences.²¹² As a result, around 20 people a month who the parole board has found safe to release are having their release dates pushed back.²¹³

In 2016, California voters approved Proposition 57, the Public Safety and Rehabilitation Act.²¹⁴ Among other provisions, Proposition 57 gave CDCR “authority to award credits earned for good behavior and approved rehabilitative or educational achievements.”²¹⁵ While California statutes had long provided credits for many incarcerated people, Proposition 57's grant of power to CDCR was embedded in the California constitution,²¹⁶ was “notwithstanding ... any other provision of law,”²¹⁷ and was to “be broadly construed to accomplish its purposes.”²¹⁸ The goals of Proposition 57 were to reduce overcrowding in California's prisons – which the United States Supreme Court had held violated the United States constitution²¹⁹ – while enhancing public safety and improving rehabilitation.²²⁰

After an extensive regulatory process, including thousands of public comments, the California Department of Corrections and Rehabilitation issued new credit-earning regulations in May 2017.²²¹ Among other credit rules, these regulations allowed people with an indeterminate sentence – one that requires appearing before the parole board to determine if release is appropriate, such as a 15 to life sentence – to advance their “minimum eligible parole date” with credits.²²² The MEPD is the earliest someone can be released from prison if they have an indeterminate sentence. Until these regulations in 2017, most life sentences could not be reduced with credits.²²³

²¹⁹ *Brown v. Plata*, 563 U.S. 493 (2011).

²²⁰ Cal. Const. Art. 1, § 32(a) (“The following provisions are hereby enacted to enhance public safety, improve rehabilitation, and avoid the release of prisoners by federal court order”).

²²¹ See Board of Parole Hearings, Fact Sheet: Criminal Justice Legal Foundation v. California Department of Corrections, et al. Litigation Update Background, 1 (July 2024); Tracey Kaplan and Robert Salonga, *Prop 57: Debate rages on about which inmates should be released early*, The Mercury News, September 5, 2017.

²²² 15 CCR § 3043(a).

²²³ See Prison Law Office, CDCR Time Credits, 4 (July 2024). Exceptions included: convictions for gross vehicular manslaughter while intoxicated with a prior conviction, Penal Code § 191.5(d); attempted murder against a public official, Penal Code § 217.1(b); and a “habitual offender” law that required causing great bodily injury before it could be imposed. Penal Code § 667.7(a)(1).

From 2017 until the middle of 2024, credits were regularly used to determine when someone with a life sentence was eligible for release. But only eligibility. No one with an indeterminate sentence was released until the Board of Parole Hearings determined they did not pose an “unreasonable risk of danger to society if released from prison.”²²⁴ Between 2018 and 2023, the approval rate by the Board of Parole Hearings for people eligible for an initial parole hearing – the group of people most likely to have had their MEPDs reduced by credits – was only 11%.²²⁵

This status quo changed because of litigation brought by a nonprofit on behalf of itself and three crime victims.²²⁶ The lawsuit alleged that Proposition 57’s credit-earning provisions were unlawful on various grounds.²²⁷ A Superior Court judge in Sacramento County rejected almost all of the lawsuit’s contentions but agreed with one of them: that credits promulgated by CDCR under its constitutional authority from Proposition 57 could not apply to reduce minimum eligible parole dates for people with indeterminate life sentences.²²⁸

The court reached this conclusion because, in its view, Penal Code section 3046 “prevents credits from reducing an inmate’s MEPD” and nothing in the text of or ballot materials for Proposition 57 discussed credits for indeterminately-sentenced people.²²⁹ The court concluded that “the authority to grant credits, in and of itself, is not sufficient to advance an inmate’s MEPD.”²³⁰

As a result, CDCR cannot apply credits to release anyone with an indeterminate sentence, even if the parole board has approved the person for release. But the Board of Parole Hearings is not prevented from conducting parole hearings based on an MEPD that was determined with credits – the end result being a confusing process where many people have parole hearings, are approved for release, and then wait months or years until a newly-calculated MEPD allows their release.²³¹

The case is currently on appeal in the Third Appellate District, with briefing not yet completed.²³² An appellate decision will take an unknown number of months to issue and a further appeal to the California Supreme Court is likely.

As Jennifer Shaffer, Executive Officer of the Board of Parole Hearings, told the Committee, the incarcerated people most affected by this litigation are those who have completed the most significant rehabilitative programming.²³³ These are the people who earned the most amount of credits and therefore had their MEPD most affected. And in the past, Kathleen Allison, Secretary of the Department of Corrections and Rehabilitation, explained to the Committee that people are more incentivized to participate in prison rehabilitative programming when it is paired with some hope of future release.²³⁴ Ms. Shaffer also noted that crime victims are impacted by the uncertainty in release dates created by the litigation.

The Committee has concluded that the Legislature should clarify to the maximum extent possible in the Penal Code that credits promulgated by CDCR under its constitutional authority apply to MEPDs. Doing so would improve public safety by allowing sentence-reducing credits to incentive rehabilitation for people in prison. It would also save the state significant money by allowing the release of people who present a very low risk to the public.

EMPIRICAL RESEARCH

People found suitable for release by the Board of Parole Hearings are among the safest to release from prison and are only approved for release after extensive consideration by the parole board and, for many, the Governor.²³⁵

For example, between 2018 and 2023, only 11% of people eligible for their first parole hearing were found suitable for release.²³⁶

PAROLE GRANT RATE FOR PEOPLE ELIGIBLE FOR INITIAL HEARING (2018–2023)

Source: California Board of Parole Hearings, Reports of Significant Events (2017–2023).

Between Fiscal Years 2011–12 and 2018–19, the parole board approved 5,248 people for release; less than 3% had a new conviction of any kind – misdemeanor or felony – within 3 years of release, and less than half of a percent (23 people) had a new felony conviction for an offense against a person.²³⁷

Research has shown that in-prison credit-earning schemes improve safety for incarcerated people and those working in prisons.²³⁸ Studies of credit-earning systems in other states have shown that recidivism outcomes are lower for people who receive credits and end up serving less time incarcerated.²³⁹ Other research has shown that people who have the opportunity to earn time off a sentence have fewer disciplinary violations while incarcerated.²⁴⁰

²³⁵ If the person's conviction was for murder, the Governor must also review the decision. California Constitution, Article 5, § 8(b); Penal Code § 3041.2. For non-murder cases, the Governor can request additional review by the parole board of any parole grant. See Penal Code § 3041.1.

2024 Administrative Report

2024 Administrative Report

CREATION OF THE COMMITTEE

The Committee on Revision of the Penal Code was formed on January 1, 2020.²⁴¹

For administrative and budgetary purposes, the Committee was located within the California Law Revision Commission. There is no substantive overlap in the work of the Committee and the Commission. By law, no person can serve on both the Commission and the Committee simultaneously.²⁴² Neither body has any authority over the substantive work of the other²⁴³ and they each have different statutory duties.²⁴⁴

The Committee consists of up to 7 members. Five are appointed by the Governor for 4-year terms.²⁴⁵ One is an assembly member selected by the Speaker of the Assembly and one is a senator selected by the Senate Committee on Rules.²⁴⁶ The Governor selects the Committee's chair.²⁴⁷

FUNCTION AND PROCEDURE OF THE COMMITTEE

The principal duties of the Committee are to:

1. Simplify and rationalize the substance of criminal law.
2. Simplify and rationalize criminal procedures.
3. Establish alternatives to incarceration that will aid in the rehabilitation of offenders.
4. Improve the system of parole and probation.²⁴⁸

The Committee is required to prepare an annual report for submission to the Governor and the Legislature.²⁴⁹

The Committee conducts its deliberations in public meetings, subject to the Bagley-Keene Open Meeting Act.²⁵⁰ In 2024, it held 5 meetings. Meetings were conducted entirely by teleconference.²⁵¹

PERSONNEL OF THE COMMITTEE

At the time this report was approved, the following people were members of the Committee:

CHAIR

Michael Romano

LEGISLATIVE MEMBERS

Senator Nancy Skinner

Assemblymember Isaac Bryan

GUBERNATORIAL APPOINTEES

Hon. Peter Espinoza

Priscilla Ocen

Heidi Rummel

²⁴¹ Government Code § 8280(b).

²⁴² See Government Code § 8281.5(d).

²⁴³ Government Code § 8290(c).

²⁴⁴ Compare Government Code §§ 8289, 8290 (duties of Commission) with Government Code § 8290.5 (duties of Committee).

²⁴⁵ Government Code § 8281.5(a), (c).

²⁴⁶ Government Code § 8281.5(a).

²⁴⁷ Government Code § 8283.

²⁴⁸ Government Code § 8290.5(a).

²⁴⁹ Government Code § 8293(b).

²⁵⁰ Government Code §§ 11120–11132.

²⁵¹ Government Code § 1123.5.

The following people are on the Committee's legal staff:

Joy F. Haviland
Senior Staff Counsel

Thomas M. Nosewicz
Legal Director

Rick Owen
Senior Staff Counsel

The following people provided substantial support for the Committee's legislative program:

Natasha Minsker
Danica Rodarmel

The following people from the California Policy Lab provided data analysis and research support for the Committee:

Mia Bird
Johanna Laco
Molly Pickard
Manny Prunty
Steven Raphael
Nefara Riesch
Alissa Skog
Thomas Sloan

The following people are staff of the California Law Revision Commission who provide managerial and administrative support for the Committee:

Sharon Reilly
Executive Director

Debora Larrabee
Chief of Administrative Services

Megan Hayenga
Office Technician

This report was designed by Taylor Le.

PLANNED ACTIVITIES FOR 2025

In 2025, the Committee expects to follow the same general deliberative process that it used in past years. It will hold regular public meetings with speakers representing all groups that have an interest in reform of the criminal legal system. At those meetings, the Committee will identify, debate, and develop recommendations for policies that improve public safety, reduce unnecessary incarceration, improve equity, and address racial disparities.

The Committee will also continue its work to establish a secure compendium of empirical data from various law enforcement and other sources in California. That data will be used by the Committee as a tool in evaluating the need for and effect of possible reforms.

ACKNOWLEDGMENTS

Many individuals and organizations participated in Committee meetings in 2024, shared their expertise with staff, made public comment, or otherwise contributed towards this report. The Committee is deeply grateful for their assistance. Panelists who presented to the Committee are listed below. Inclusion of an individual or organization in this list in no way indicates that person's or their organization's view on the Committee's recommendations.

PANELISTS

(in alphabetical order)

Obie Anthony

Founder and Executive Director, Exonerated Nation

Hon. Lawrence Brown

Sacramento County Superior Court

Bayliss Camp

Branch Chief, Research and Development, Department of Motor Vehicles

Joel Caplan

Professor, Rutgers School of Criminal Justice

Katie Cardenas

Deputy Executive Officer, External Affairs and Compliance Division, California Victim Compensation Board

Dr. Gena Castro Rodriguez

Executive Director, National Alliance for Trauma Recovery Centers

Steven Jesse Corral

Deputy District Attorney, Alameda County District Attorney's Office

Hon. Scott Cooper

Orange County Superior Court

Reygan Cunningham
Co-Director, California Partnership for Safe Communities

Dr. Annette Dekker
Assistant Professor, Department of Emergency Medicine, UCLA David Geffen School of Medicine

Hon. Kristine Eagle
San Joaquin County Superior Court

Jon Eldan
Founder and Executive Director, After Innocence

James Fell
Principal Research Scientist, NORC at the University of Chicago

Ari Freilich
Director, Department of Justice, Office of Gun Violence Prevention

Lynda Gledhill
Executive Officer, California Victim Compensation Board

Ian Goldstein
VP of Public Affairs, Mothers Against Drunk Driving

Brandon Greene
Director of Policy Advocacy, Western Center on Law and Poverty

Jennifer Hansen
Attorney, California Appellate Project

Jasmin Harris
Director of Policy, The Innocence Center

Jeannie Ho
Section Chief, DUI Licensing Unit, California Department of Health Care Services

Janelle Ito-Orille
Division Chief, Licensing and Certification Division, Department of Health Care Services

Robin Johnson
Assistant Chief, California Highway Patrol

Lauren Knoth-Peterson
Senior Research Scientist, Washington Public Safety and Policy Research Center

Ruy Laredo
Legislative Coordinator, Legislative and Governmental Affairs, Department of Health Care Services

Anita Lee
Principal Fiscal & Policy Analyst, Legislative Analyst's Office

Chief Kathy Lester
Sacramento Police Department

Marisa McKeown
Deputy District Attorney, Santa Clara District Attorney

Mike McLively
Policy Director, Giffords Center for Violence Intervention

Nathaniel Miller
Attorney at Law

James Mink
Policy Lead, After Innocence

David Muhammad
Executive Director, National Institute for Criminal Justice Reform

Crystal Sanchez
Branch Chief, Licensing and Certification Division, Department of Health Care Services

Julia Weber
Consultant, Giffords Law Center to Prevent Gun Violence

Dr. Garen J. Wintemute
UC Davis, Director, Violence Prevention Research Program

Dustin Woida
Sergeant, California Highway Patrol

Belle Yan
*Assistant Professor and Supervising Attorney, University of San Francisco School of Law
Racial Justice Clinic*

OTHER SUPPORT

The Committee is grateful to the Legislature and Governor for providing generous support for the Committee's research and data analysis with the California Policy Lab. The Committee also extends special thanks to personnel at the California Department of Corrections and Rehabilitation Department of Research and the California Department of Justice Research Department. The Committee also received generous support from staff and faculty at Stanford Law School, the Stanford Law School Library, and the Three Strikes Project.

2024 Committee
Members

Appendix

Appendix: Biographies of 2024 Committee Members

Michael Romano, of San Francisco, serves as chair of the Committee on Revision of the Penal Code. Romano teaches criminal justice policy and practice at Stanford Law School and has been director of the Stanford Justice Advocacy Project since 2007. Romano has collaborated with numerous local, state, and federal agencies, including the United States Department of Justice and Office of White House Counsel under President Obama. He has also served as counsel for the NAACP Legal Defense and Educational Fund and other civil rights organizations. Romano was a law clerk for the Honorable Richard Tallman at the United States Court of Appeals for the Ninth Circuit from 2003 to 2004 and a legal researcher for the Innocence Project from 2000 to 2001. He earned a juris doctor degree with honors from Stanford Law School and a master of laws degree from Yale Law School.

Assemblymember Isaac Bryan, of Los Angeles, has been a member of the Assembly since 2021 and represents the 54th Assembly District, which includes, among other neighborhoods, Baldwin Hills, Crenshaw, Century City, Culver City, and Westwood. Prior to his election, Assemblymember Bryan served as the founding Director of the UCLA Black Policy Project, a think tank dedicated to advancing racial equity through policy analysis, served as the first Director of Public Policy at the UCLA Ralph J. Bunche Center, and Director of Organizing for the Million Dollar Hoods project. Assemblymember Bryan has authored several influential policy reports and led several campaigns at the intersection of racial, economic, and social justice. He earned a Master of Public Policy from the University of California, Los Angeles.

Peter Espinoza, of Los Angeles, served as director of the Office of Diversion and Reentry at the Los Angeles County Department of Health Services from 2016 to 2021. He served as a commissioner and judge at the Los Angeles County Superior Court from 1990 to 2016. Espinoza was an attorney at Peter Espinoza Attorney at Law from 1984 to 1990. Espinoza was a deputy public defender at the Orange County Public Defender's Office from 1981 to 1983. He earned a juris doctor degree from the University of California, Los Angeles, School of Law.

Priscilla Ocen, of Los Angeles, is a Professor of Law at Loyola Law School, where she teaches criminal law, family law, and a seminar on race, gender and the law. Ocen received the inaugural PEN America Writing for Justice Literary Fellowship and served as a 2019-2020 Fulbright Fellow, based out of Makerere University School of Law in Kampala, Uganda, where she studied the relationship between gender-based violence and women's incarceration. Ocen recently served as a Special Assistant Attorney General for the California Department of Justice and advised Attorney General Rob Bonta on issues related to criminal justice reform. She was also a member and former Chair of the Los Angeles Sheriff's Oversight Commission. She earned a juris doctor degree from the University of California Los Angeles, School of Law.

Heidi Rummel, of Los Angeles, is Clinical Professor of Law and Director, Post-Conviction Justice Project, at USC Gould School of Law. Under her supervision, second and third-year law students represent clients serving life terms in California prisons, many of whom were sentenced for crimes they committed in their youth. The Project has won the release of close to 200 clients through the parole process, on habeas corpus challenging the denial of parole, on resentencing petitions, and on habeas corpus challenging murder convictions where expert testimony of intimate partner violence was not admitted at trial. Prior to joining the USC Gould School of Law faculty, Rummel served in the United States Attorney's Office in Los Angeles from 1996-2005 prosecuting federal criminal civil rights offenses, including human trafficking, police misconduct, and hate crimes. She also prosecuted gang crimes, arson cases, and child pornography offenses, and served as deputy chief in the General Crimes Section. Previously, Rummel was an Assistant United States Attorney for the District of Columbia, where she handled state court prosecutions and appellate matters. She clerked for the Honorable Thomas Penfield Jackson of the United States District Court for the District of Columbia. Rummel holds a BA from the University of North Carolina at Chapel Hill with highest honors and a JD from the University of Chicago with honors.

Senator Nancy Skinner, of Berkeley, was a member of the Senate 2016 to 2024. She was a member of the Assembly from 2008 to 2014. Senator Skinner represented California's 9th Senate District, which includes Oakland, Berkeley, and Richmond, and chaired the Senate Budget Committee. Senator Skinner is a longtime justice reform advocate and the author of two landmark California laws: SB 1421, which made police misconduct records available to the public for the first time in 40 years, and SB 1437, which reformed the state's felony murder rule so that people who do not commit murder can't be convicted of that crime. She also authored bills to reduce gun violence and allow people with prior felony convictions to serve on juries. Her legislative efforts have resulted in cuts to the number of juveniles incarcerated in state facilities by half; established a new, dedicated fund to reduce prison recidivism; reduced parole terms; and banned the box for higher education. She earned a master's degree in education from the University of California, Berkeley.
